FROM THE MOUNTAIN
FOR THE MOUNTAIN

FEEL

FROM THE MOUNTAIN.

FOR THE MOUNTAIN.

Carving fresh tracks in the search for a more sustainable future

RETHINK. REBOOT.

The mountain is for everyone. But for future generations to enjoy the same thrill of skiing we do today, we must all go further to protect our planet. It's time to RETHINK.

That's why we developed REBOOT, the project behind the world's most sustainable boot for young skiers.

WE USE

100%

certified renewable energy for the injection and assembly of our ski boots and up to 90% of the weight of our boots comes from recycled materials.

SHELL & CUFF

The plastic shell and cuff components are made of recaptured plastics and 100% recycled materials recovered directly from our own production process.

LINERS

Our ski boot liners are made from entirely recycled materials - a first for the industry. These include TPU foams from reground material, recycled EVA and polyester.
