2022/23

**elan**™

ELAN, BEGUNJE NA GORENJSKEM

ELAN is a dedicated ski manufacturer in the Slovenian Alps, with more than 75 years of experience building the best skis in the world, for friends and families who live the skiing lifestyle and are all about good times in the mountains.

## *Always Good Times®*

Good times is what Elan is all about, and the best times are those spent with friends and family in the mountains. Whether it's a family weekend road trip to your favorite local destination or a backcountry adventure with your best friends, it's always good times when you surround yourself with the people you're closest to.

# INNOVATION DELIVERS EXPERIENCE

At Elan, we've been innovating for decades for one simple purpose – to make the skiing experience better for everyone, from beginner to expert. Decades of constantly pushing the design envelope – from sidecuts to constructions, materials to production processes – we challenge ourselves to design the best performance, highest quality, state-of-the-art products for friends and families to enjoy great days on the mountain. It is with this uncommon valor that we have committed our brand to this one goal, and to deliver on our promise to make every day the best day on snow for Elan skiers.

# VOYAGER

MAKING  
THE MOUNTAINS  
CLOSER

In our new world, one thing remains crystal clear - devoted skiers still want to spend their precious spare time in the mountains. And in the face of rapidly changing travel habits, anything that can make that goal easier to achieve is invaluable. The new Elan Voyager, the world's first fully functional, folding, all-mountain ski. Convenient to transport - be it by car, train or plane: simply & quickly pack it into its custom bag. Despite being so space-efficient, the Voyager will tackle anything a demanding skier can throw at it without sacrificing any performance.

## NEW CONNECT TECHNOLOGY

The secret to Connect Technology® is a 4 axis mechanism that bonds and seals the ski together at the folding joint combined with a Carbon reinforced Fusion plate that serves as a load-bearing platform. The combination of the two components provides rigidity to the ski for superior performance, but also allowing the ski to fold into a compact, easy to transport package.

THE NEXT SKI  
ADVENTURE IS  
JUST AROUND  
THE CORNER

# RIPSTICK TOUR

The Elan Ripstick Tour was created for touring skiers with the intent to deliver the superior downhill performance of a freeride ski at a fraction of the weight for uphill efficiency. The series is designed from the ground up with the goal of pushing skiing performance to the maximum without losing focus on the functionality necessary for comfortable climbs. The engine that allows us to blend these concepts is Carbon Bridge Technology; a revolutionary solution where a single carbon rod is placed on top of the ski, to provide stability at speed and vibration absorption through the tip in variable snow, without a weight penalty.

**NEW**  
**CARBON BRIDGE TECHNOLOGY**

Carbon Bridge Technology, is a revolutionary solution where a single carbon rod placed on the upper part of the ski, provides stability, dampening, and vibration absorption through the tip.

**Elan by ATK**  
Bindings

**NEW**  
**360° SIDEWALL**

360° Sidewall is a unique and effective sidewall solution to maximize performance while keeping the weight low. Pyramidal shaped sidewalls are positioned throughout the whole body of the ski, to increase vibration absorption and high-speed stability.

# BLACK EDITION

*studio*

The Elan W Studio Black Edition collection is the peak of high performance skis. Elegant style and timeless design are merged with a state-of-the-art carbon construction that takes both Wildcats 76 C and 86 C and Ripstick 94 W performance and versatility to the next level delivering unmatched smoothness and power. Our best all-mountain and freeride skis just got stronger.

An incredible power lies in women who succeed to be mothers, sisters, friends, partners, and leaders; and who always find time for their passions and hobbies. Having fun on the snow is one of the greatest outlets for women, it harnesses a passion that has inspired us here at the W Studio for the last 15 years to create and enhance skis that reflect your needs and wishes. We listen to your preferences and adopt technology that drives confidence in every turn. Our innovation is fed by your desire to bring laughter and energy in the mountains regardless of your skiing ability. Skiing is the freedom of expression, the energy of community and the moment to have the time of your life.

# SKIER JOURNEY

We know that every skier's journey is different, and choosing the right ski can be a daunting task. In 2022/23, we've further simplified our model offering and organized it in a way that's simple and easy to understand for everyone. Depending on the skier type, Elan customers can easily decide where they fit into our collection and decide on the next logical step in their skiing journey depending on their skiing preference.

# VOYAGER

MAKING THE MOUNTAINS CLOSER

Functionality, intuition, and long-term quality are the three main design drivers. Design emphasizes usefulness in a way that concentrates on essential only aspects and makes the product self-explanatory and intuitive. The ski delivers a never-seen-before folding functionality, so part of design is in the role of intuitive folding ability. The fold/unfold is achieved by rotational moves to allow snow or ice to slide out of the way. The areas that are exposed to folding & rotation are designed with care for long-term usage, even after countless repetition. Some design elements were inspired by aviation iconography as the ultimate mobility reference.

## Connect Technology

Elan's revolutionary Connect Technology®, which uses a highly advanced mechanism that bonds and seals the ski together at the folding joint, and allows the ski to fold into a compact, easy to transport package. All components slip together and seal securely, making a structurally strong, robust and lively ski for a great experience.

# Making the mountains closer With the new Elan Voyager

Voyager gear redefines ski travel and storage of ski equipment. The two Voyager bags are designed for packing folded skis and poles. Pack opens up new travel experiences from home to a favorite ski resort while reducing gear storage space between adventures.

## What Fits in Voyager Bags?

### SKIER ON THE GO

The next ski adventure is just around the corner. Ski gear is completely packed in a Voyager travel bag, anticipating the next destination. Whether by plane, train, or automobile, Voyager is always ready to go. Travel is nimble, easy and fast. No oversize luggage lines, no equipment rental lines, Voyager is the express lane from the living room to having fun on the slopes.

### THE URBAN TRAVELER

The connection from home to the ski resort has never been easier. A compact Voyager 1 pair ski bag easily loads into the car. No roof rack or folding down the back seats necessary, enabling a simple drive to the favorite ski destination and discovering the best day on snow.

### VOYAGER TRAVEL BAG

The world's most space-efficient and stylish roller ski bag designed to transport and travel with Elan's Voyager skis, poles, and much more all in one bag!

RACE  
ACE

## POWER & CONTROL TO TAKE CHARGE

For more than 75 years, traditional ski racing has been the pinnacle of competition in our sport - the true test of skiing skill and the ultimate proving ground for new products and innovations. But as the skiing landscape has evolved over the last decade, new forms of competition have emerged that fly in the face of conventional ski racing and are inspiring a new generation of competitors - a generation of ski-cross racers that want to defy conventional wisdom and pioneer new ways of expression and competition. This is Ski Cross and THIS is the future of Elan racing - time to shift gears!

## Ace Arrow Technology

Ace Arrow Technology allows you to make your turns with the precision of a razor blade. Arrow tip and tail turn each command into motion. Arrow technology is the utilization of strategically shaped plates and titanium structural layers in the ski that work in harmony to deliver a lightning quick response with world-class precision and accuracy. A cambered carbon composite plate is fixed to the ski and acts as a booster that generates power to the tip and tail. The upper arrow shaped titanium layer gathers and transfers this energy simultaneously which translates into instant superior edge pressure, while the lower inverse arrow shaped titanium layer brings quickness and lightness to turn entry and stability on turn exit without added weight.

## THE NEXT DIMENSION OF ALL MOUNTAIN SKIING

The Amphibio series marks a new era for the ever-evolving, always-innovative all-mountain ski collection. The highly versatile, dynamic and maneuverable skis are designed for the best among all-mountain skiers. Known for their high performance from an asymmetrical Amphibio profile, the series takes it to the next level with Amphibio Truline Technology for the perfect turn while the Fusion X binding system provides a smooth, free flex performance. The Amphibio series compromises nothing and promises everything you need to be the king of the slopes.

### Amphibio Truline Technology

Amphibio Truline elevates the asymmetrical ski design to the next dimension by strategically locating materials over the edges of the skis. Structural material is placed over the full length of the inside ski edge, providing more stability to power the turn, while less material is applied over the outside edge, resulting in a smooth and easy perfect turn.

**Amphibio Profile**

## THE ULTIMATE ALL-MOUNTAIN COMPANION

The Wingman series fuses Elan's award-winning technologies with a fresh take on all-mountain skiing. Built to enhance the energy of the all-mountain skier in any condition and terrain, the Wingman always has your back. As the closest bridge to the Ripstick collection, the Wingman is built with the next evolution of Elan's modern asymmetrical ski design, Amphibio Tech with Truline influencing the profile and construction of dedicated right and left skis to make the perfect turn.

### Amphibio Truline Technology

Amphibio Truline elevates the asymmetrical ski design to the next dimension by strategically locating materials over the edges of the skis. Structural material is placed over the full length of the inside ski edge, providing more stability to power the turn, while less material is applied over the outside edge, resulting in a smooth and easy perfect turn.

# FREERIDE RIPSTICK

## BUILT FOR THE TOUGHEST TERRAIN AND CONDITIONS, THE NAME SAYS IT ALL.

Designed and built to handle the most challenging terrain in any snow condition the mountain can dish out, the Ripstick series is the ultimate Freeskiing tool for demanding skiers. Constructed with a progressive shape and Amphibio Carbon Line technology to maximize weight savings and stability, the Ripstick delivers uncompromised versatility and smooth performance. With the addition of the Amphibio profile, Carbon Rods, and SST sidewall construction for power and precision, the Ripstick floats like a butterfly and springs like a ski.

## Carbon Line Technology

Amphibio Carbon Line technology is a combination of innovations that provide the best balance of lightweight construction with power and performance. Amphibio Carbon Line technology elevates the asymmetrical ski design to the next level by strategically locating carbon reinforcement over the inside edges of the skis providing more power in the turn, while carbon rods inserted into the woodcore maximize weight savings and overall stability. The end result is an extremely lightweight high performance ski with uncompromised versatility and smooth performance.

FREERIDE  
RIPSTICK

## LIGHT-WEIGHT EQUIPMENT FOR WANDERLUST EXPLORATION

The Elan Ripstick Tour was created for touring skiers with the intent to deliver the superior downhill performance of a freeride ski at a fraction of the weight for uphill efficiency. The series is designed from the ground up with the goal of pushing skiing performance to the maximum without losing focus on the functionality necessary for comfortable climbs. The engine that allows us to blend these concepts is Carbon Bridge Technology; a revolutionary solution where a single carbon rod is placed on top of the ski, to provide stability at speed and vibration absorption through the tip in variable snow, without a weight penalty.

### Carbon Bridge Technology

Carbon Bridge Technology, is a revolutionary solution where a single carbon is rod placed on the upper part of the ski, provides stability, dampening, and vibration absorption through the tip.

# RIPSTICK TOUR 94

## Mountain Warrior

The new Ripstick Tour 94 is designed on a wider platform, enabling the skier to float better, ski faster, and turn easier in backcountry conditions.

## UPHILL EFFICIENCY MEETS POWER AND PERFORMANCE

The IBEX series was designed for those who leave the chairlift behind and feel the best source of energy is human power. From exercise to adventure, The IBEX series incorporates Elan's Tubelite woodcore, which reduces weight and improves efficiency, while Bridge Technology results in stable and secure descents with confidence. Up or down, Elan's adventure series sets the standard in high performance touring skis.

## Bridge Technology

Bridge technology is a unique design that reduces weight and enhances performance. An ultra-thin wood core profile is reinforced with bridge inserts from tip to tail providing torsional stability and unparalleled power transfer to the edges.

# TOURING PERFORMANCE LYNX

## BUILT FOR EFFORTLESS CLIMBING & FAST SKIING PERFORMANCE.

The LYNX series was designed for those who know that every gram counts when it comes to being fast on the ascent. These skis deliver an exceptionally light, yet strong and stable feel. From racing, to long, fast-paced ski tours, the LYNX series incorporates Elan's AirLite Technology, using a carefully selected and shaped wood core which reduces the weight to the minimum for uphill efficiency, while EST-Touring sidewall results in effortless and confident descents. Up or down, Elan's LYNX series sets the standard in high-performance Touring skis.

## A I R L I T E T E C H

CYA Plate

Assures secure mounting of binding to the ski.

AirLite Technology

Extra light and extra strong

Carbon Reinforcement

For lightweight, stability & powerful rebound

EST Touring Sidewall

Superior race performance.

Sintered Base

Excellent durability and superb gliding performance.

AirLite Laminated Woodcore

The lightest wood core construction

## LYNX 65 UL

**Super Light and Super Fast.**  
At just 690 g, Lynx sets a new benchmark in touring performance. Superlight materials and AirLite technology are combined with EST touring sidewalls resulting in the perfect blend of efficiency and confidence. Enjoy the climb.

BINDING	

## Elan by ATK Bindings

### Performing through lightness

Elan by ATK touring bindings are engineered to the highest performance standards. Providing the lightest, most reliable and enjoyable approach to the mountain.

### QUALITY AND SAFETY

Quality and safety are some of the most important features when considering touring equipment. That is why Elan bindings are designed and tested in the ATK laboratory to assure every binding meets exact standards to provide predictable release, retention, and performance. We use durable aluminum components to withstand years of use, backed by best in class low warranty rates.

### RELIABILITY AND EXCLUSIVITY

ATK BINDINGS® products have built their identity on excellence: an incomparable lightness combined with the highest quality and functionality, immediately brought out the full potential of ATK® bindings, creating a unique product, meant to offer the best performance ever.

### MADE IN EUROPE

The entire production process (concept to product delivery), is realized by Italian ingenuity and craftsmanship, as a guarantee of the highest quality standards, innovation and design.

### TECHNOLOGY AND INNOVATION

Continuous innovation and technological research ranging from production methods to the exploration of new patented systems. All components of Elan by ATK bindings are CNC machined thus obtaining maximum precision and reliability.

### SERVICE – 360°

The technical competence, the customization of the service and the speed of intervention of ATK professionals are some of the strengths that allow to win the trust of all those customers who require a reactive, effective and resolving service.

## Technology

### CAM RELEASE SYSTEM

The patented CAM RELEASE SYSTEM® is fitted inside of our touring bindings heels in order to drive the boot step-in and vertical release in case of fall.

### SNOW PACK PROOF

A special design of the toe part that avoids any snow/ice/debris build-up under the hooking elements.

### EASY ENTRY SYSTEM

This system is characterized by a new geometry of the toe part elements.

### MAGNETO HEEL FLAPS

Simple magnet system providing stabilization of the heel flaps.

### ELASTIC RESPONSE SYSTEM

Grants the natural ski flex, also in case of big jumps/compressions.

Only the ATK bindings can give you the lightest, most reliable and enjoyable approach to the mountain.

ADVENTURE  
FOLDABLE  
TOURING SKI

Elan understands how skiing on your preferred personal ski equipment can enhance the overall experience, especially when skiing in new destinations. But, we also understand the difficulty of transporting your equipment. While modes of transportation have improved and become more frequent to popular skiing destinations like the East Coast, West Coast, Canada or Europe, it can still be not only expensive but cumbersome to travel with your skis. To make the transportation of skis easier and faster, Elan has developed the first fully foldable touring ski, the Ibex Tactix.

1

Skis are divided into 2 parts connected by a plate.

2

When folding the ski, the plate is rotated around the pivot 180 degrees.

3

In folded state the plate is fixed on the front part of the ski, the rear part ski is folded around central joint 180 degrees.

4

In ski mode bearing plate assumes all forces in the area of the joint.

## IBEX TACTIX CARBON ION 12

### *Simple to carry, easy to ski*

Traditional ski equipment poses many limitations for easy transportation during adventures in the mountains across snow, rocks and other mixed terrain. In order to improve the mobility and transport of skis, Elan created a foldable ski with high-end ski performance and zero limitations of movement. It easily attaches to a pack quickly and securely.

Folding skis strapped to a backpack allow for much greater maneuverability and safety during technical ascents. With a folding ski, the ski doesn't stick out above the climber's head or below the belt to impede the climbers movements. Folding skis are also better for climbs that require the use of ice axes because the climber's can swing the axes freely overhead. Folding skis are also an advantage on descents, particularly at times when the skier needs to take off the skis for whatever reason. The Elan folding ski is strong enough to handle the immense forces and enables secure skiing in all possible conditions.

## ALWAYS IN BALANCE, ALWAYS IN CONTROL

At Elan, skiing is a lifestyle. Whether you only go once a year or aspire to summit the highest peaks, it's all about experiencing the good times with friends and family. The spirit of our brand is inspired by the purest form of winter joy from powder days to carving perfect corduroy, from smiling in the sunshine on the lift with friends to toasting a day shared on the slopes together at après. Skiing is made of countless priceless moments. In effort to harmonize these moments with the feelings and motion of skiing, Elan developed a category designed to make good skiers and good times, even better.

## Groove Technology

Groove Technology is ultimate confidence booster. It harmonizes balance and control with rib-shaped energizers that create a uniform flex profile, helping skiers find the stability they need to excel on the mountain. In the turn, the grooves assure a powerful, energized performance.

## POWER & CONTROL TO TAKE CHARGE

The Race line represents Elan's lifeblood. These skis are intended for the most demanding skiers. They are built for experienced skiers that know what they want from a ski. Skis belonging to the Race class are uncompromising arrows. Regardless of whether you choose skis for ski cross, slalom or giant slalom, you will always get the highest possible level of ski proficiency out of them. Elan race skis now have a brand new body shape and identity. A synonym for speed, strength and power is the arrow.

## YOUTHFUL QUALITY

The key to a long-lasting relationship with skiing is keeping the passion alive from childhood to adulthood. At Elan we value the pivotal point in ski careers for both pre-teens and teenagers, and understand their need for the best product to advance their skills, because good product leads to good times. For those looking to perfect their gate turn and advance in the racing world, Elan's RC Ace is built to step up your game. For those adventuring into softer snow or entering the world of Freeride the RC Wingman and Ripstick 86 T and TW are the best options out there for the next generations of skiers.

## RC Models Tech

### CHANNEL WOODCORE

Specially designed for kids, where channels are cut into poplar core, delivering responsiveness and optimal flex at the same time.

### EST SIDEWALL

Extended sidewall construction, delivering perfect power transmission from skier to the edge and stability of the ski is uncompromised.

## RIPSTICK 86 T

### ***Ticket to (free) ride***

Built for the next generation of free skiing, the Ripstick 86T offers junior freeriders a perfect blend of lightweight construction, performance and maneuverability in any situation.

CODE	AEJVN22		
PROFILE	Mountain Rocker		
TECHNOLOGY	SST Sidewall, Laminated Woodcore, Fibreglass

ALL MOUNTAIN  
KIDS

U·FLEX  
TECHNOLOGY

## SKIING AS EASY AS WALKING

The fun factor!

Elan has just increased the fun factor for skier kids by 250%! Our exclusive U-Flex technology makes the ski 25% more flexible than the industry standard, allowing mini-skiers to carve turns as well as their parents. Elan offers a complete package of skis and boots that both feature U-Flex technology and provide the best possible performance combination for young skiers.

**PROBLEM**  
Stiff flex

**SOLUTION**  
U-Flex technology

**FLEXING SKI BOOT**

**NEW  
JRS PLATE**

**FLEXING SKI**

**25% SOFTER FLEX**

**EASY TURNING = SIMPLE LEARNING**

Skis are 25% more flexible than the benchmark, enabling kids to make effortless smooth and easy turns for more fun on snow. These skis make skiing simple and fast to learn.

**25% more flex,**  
**250% more fun**

All-Mountain Kids are the most innovative Junior skis available on the market thanks to Elan's patented U-Flex technology. U-Flex enables young skiers to fully flex the ski underfoot allowing them to feel the sensation of carving from their very first turn.

## U-Flex Ski Boot

Following the concept that improved flexibility, improves and enhances learning, U-Flex technology has also been developed for ski boots. Now we can offer the market a complete package of skis + ski boots that facilitate this objective. The new boot flexes according to the anatomy of the foot, further allowing for the natural flexibility of the ski for easy learning.

### 1 OPTIMIZED SKI BOOT FLEX

The Elan U-Flex ski boot allows the boot to flex in a way that enhances the natural movement of the toes and to easily follow the ski flex thanks to the front sole movement.

U-FLEX  
TECHNOLOGY

### 2 KEEPS THE FEET WARM

Kid's feet stay warm and comfortable thanks to the boot's flex, which allows them to move their toes, and the high quality of the materials used for the liners.

### 3 VOLUME CONTROL PLATE

With the volume control plate one ski boot size covers 3 foot sizes. Each ski boot is provided with an inside plate that modifies the inside volume and the ski boot's size depends on which side it is placed.

### 4 SOLE

The boot's sole moves together with the flex of the boot allowing the best flexibility.

# HELMETS

## New EON Helmet

Elan is proud to introduce the new EON helmet. It's the first snowsports safety product completely designed in the Slovenian alps. Our team was challenged to ensure the best solution to protect skiers in any conditions. It's innovative design approach covers single or dual shell protection and best in class 360° comfort.

NEW MODEL

## EON PRO VISOR Black

**CODE\_** CE020422051 (51-55), CE020422056 (56-59), CE020422060 (60-62)

**CONSTRUCTION\_** PC - Inmold

**FIT SYSTEM\_** BOA® 360 Fit System

**SIZES\_** 51-55 (S), 56-59 (M), 60-62 (L)

**FEATURES\_** Retina Visor / 100% UV protection / IRDS Construction - Impact resistant double shell / Adjustable Airstream / AirFlow Liner / Removable liner / Pure sound earpads / Removable Earpads / Removable liner / Easy Strap System / Designed in the Slovenian Alps

**COLOR\_** Black

## Protector Fusion X Bindings Recommended By Your Knees

### WHAT

PROTECTOR – The safest binding position

### HOW

PROTECTOR with FULL HEEL RELEASE (FHR) - releasing 180° (laterally and vertically): reducing release values in forward & backward twisting falls.

### WHY

Thanks to FULL HEEL RELEASE (vertical & lateral) the new PROTECTOR binding can help reduce the risk of ACL injury, leading to a significant increase in safety.

\* Protector bindings available as alternative binding option on all models with emx bindings. EMX 12 can be replaced by Protector 13, and EMX 11, can be replaced by Protector 11.

## How does it work?

- 1 7 mm lateral movement in both directions.

### Benefit:

This elasticity absorbs all impacts on the binding and avoids pre-releases.

- 2 Then 30° rotation: The rotation is only initiated when the loads are too high and the ski boot is released.

### Protector bindings In Elan collection

# POLES

## Pole Technology

When searching for a perfect ski pole to improve your Elan ski experience look no further than the newest Elan ski pole collection. Our complete range of ski poles is tested and proven at the highest level of skiing, assuring safety, comfort and control in every situation.

### DESIGN AND COLORS

Poles are not only an important tool of the trade, we realize it's also important to have good looking equipment. Elan keeps graphics and trends fresh in design, with strong colors and coordinated looks.

### GRIP

One of the more important features of the pole, the grip is the touchpoint between you and your poles all day long. Designed in the Alps, Elan introduces the new Bulwark BIC grip, featuring a hybrid design for efficiency, reduced weight, comfort and strength.

**BIC**  
Bi  
Component  
Grip

**SIC**  
Single  
Component  
Grip

### SHAFT

The heart of a ski pole is the shaft. Elan poles are offered in high grade 5083 or 7075 aluminum for extra strength and safety, high quality carbon, or composite glass fibers for a lightweight construction.

### BASKET

Elan offers a wide range of various baskets specifically designed to give you the ultimate skiing experience.

### TIPS

When it comes to contact with the snow, Elan provides a reliable grip anywhere on the mountain with the highest quality steel and carbide tips found on every pole.

## CARRY ON 50L BAG

**CODE\_** CG302220000

**FEATURE OVERVIEW\_** Cabin Luggage Dimensions / Split Main Compartment / Front Small Pockets / Extendable handle / Silent wheels / Increased tightening straps / Carrying handles / Side pockets / Name tag pocket

**MATERIAL\_** Highly Resistant Polyester / PVC

**DIMENSIONS / VOLUME\_** 35 x 28 x 54,5cm / 50L

**COLOR\_** Black

## LIGHT 8L BAG LIGHT 50L BAG

**CODE\_** CG592819000 (small), CG593019000 (large)

**FEATURE OVERVIEW\_** Mono compartment / Lightweight construction

**MATERIAL\_** Highly Resistant Polyester

**DIMENSIONS / VOLUME\_** 28,5 x 40cm / 8L  
50 x 78,5cm / 50L

**COLOR\_** Black

PROFILES

**AMPHIBIO PROFILE**

Amphibio technology is a revolutionary ski design that integrates both rocker and camber profiles into dedicated left and right skis. Amphibio skis feature a cambered inside edge assuring precision, edge grip and stability - while a rockered outside edge provides forgiveness, turning ease and smooth transitions.

**CAMBER PROFILE**

A cambered profile has edge contact from tip to tail and provides superior edge grip, stability, and power transmission over the full length of the ski.

**PARABOLIC ROCKER PROFILE**

This unique Elan design combines a generous amount of sidecut with slightly lifted tip and tail, which results in easy turn initiation with less effort. This combination allows a skier to progress faster and with this progression, passion for skiing increases.

**EARLY RISE ROCKER PROFILE**

Early Rise Rocker provides smooth and effortless turns thanks to a moderate amount of rockered tip incorporated into the ski.

**MOUNTAIN ROCKER PROFILE**

Mountain Rocker profile incorporates moderate tip and tail rocker for better flotation, easier turn initiation and versatility in varied snow conditions. Combined with a moderate amount of camber underfoot, Mountain Rocker also delivers great precision and stability on groomed slopes.

**JIB ROCKER**

Jib Rocker provides pipe and park riders with the perfect amount of tip and tail rocker to maximize pop and power, while ensuring smooth landings, transitions and butters.

CORE TECHNOLOGY

**AMPHIBIO TECH**

Amphibio Tech is the complete, full dimension asymmetrical ski design. Influencing both the profile and construction of dedicated right and left skis.

**AMPHIBIO TRULINE TECHNOLOGY**

Amphibio Truline elevates the asymmetrical ski design to the next dimension by strategically locating materials over the edges of the skis. Structural material is placed over the full length of the inside ski edge, providing more stability to power the turn- while less material is applied over the outside edge, resulting in a smooth and easy perfect turn.

**AMPHIBIO TRULINE W TECHNOLOGY**

Amphibio Truline W Technology is the most advanced asymmetrical ski design on the market for women, designed and tested by the Elan W Studio. The foundation is a leaner, more agile profile; structural material is strategically placed over the full length of the inside ski edge, providing more stability to power the turn-while less material is applied over the outside edge, allowing for quick and smooth perfection within each turn.

**AMPHIBIO CARBON LINE TECHNOLOGY**

Amphibio Carbon Line technology is a combination of innovations that provide the best balance of lightweight construction with power and performance. Amphibio Carbon Line technology elevates the asymmetrical ski design to the next level by strategically locating carbon reinforcement over the inside edges of the skis providing more power in the turn, while carbon rods inserted into the woodcore maximize weight savings and overall stability . The end result is an extremely lightweight high performance ski with uncompromised versatility and smooth performance.

**ACE ARROW TECHNOLOGY**

Ace Arrow Technology allows you to make your turns with the precision of a razor blade. Arrow tip and tail turn each command into motion.Ace Arrow technology is the utilization of strategically shaped plates and titanium structural layers in the ski that work in harmony to deliver a lightning quick response with world-class precision and accuracy. A cambered carbon composite plate is fixed to the ski and acts as a booster that generates power to the tip and tail. Upper arrow shaped titanium layer

gathers and transfers this energy simultaneously which translates into instant superior edge pressure, while lower inverse arrow shaped titanium layer brings quickness and lightness to turn entry and stability on turn exit without added weight.

CONSTRUCTION

**U-FLEX TECHNOLOGY**

U-Flex technology is a unique construction and profile that allows a junior ski to be 25% more flexible. In combination with the lightweight Synflex core, Full Power Cap construction and Early Rise Rocker profile, U-Flex allows kids to learn to ski on their edges from day 1. This unique and patented technology enables easy learning and a better learning experience.

**BRIDGE TECHNOLOGY**

Bridge technology is a unique design that reduces weight and enhances performance. An ultra-thin wood core profile is reinforced with bridge inserts from tip to tail providing torsional stability and unparalleled power transfer to the edges.

**CARBON BRIDGE TECHNOLOGY**

Carbon Bridge Technology, is a revolutionary solution where a single carbon rod placed on the upper part of the ski, provides stability, dampening, and vibration absorption through the tip.

**CONNECT TECHNOLOGY**

Elan's revolutionary Connect Technology®, which uses a highly advanced mechanism that bonds and seals the ski together at the folding joint, and allows the ski to fold into a compact, easy to transport package. All components slip together and seal securely, making a structurally strong, robust and lively ski for a great experience.

**AIRLITE TECHNOLOGY**

AirLite is a unique lightweight ski technology that offers the best ratio of weight to performance in the race world. A technically perfected 3D shape in combination with innovative core construction, establishes strength and stability of the ski at an unbelievably light weight.

**RST**

The RST Construction optimizes the transfer of power and energy from the skier to the edge, providing maximum edge hold from the tip to the tail of the ski.

**SST**

The SST Construction provides quick, nimble and direct power transmission from the ski to snow as well as providing exceptional torsional rigidity.

**PST**

The PST construction is the best balance of power and forgiveness. The Cap/Sidewall construction is both lightweight and forgiving while equally powerful and stable.

**EST**

Extended sidewall construction, delivering perfect power transmission from skier to the edge and stability of the ski is uncompromised.

**EST - TOURING**

Extended sidewall construction delivers perfect power transmission from skier to the edge and uncompromised stability, for superior race performance.

**POWER SHELL**

Side to side reinforced shell construction, distributing force and stability to every inch of the ski without adding extra weight. Skiers on skis with power shell construction benefit from direct and powerful force transmission throughout the ski assuring perfect control.

**HD POWER SHELL**

Featured only on Elan rental skis, the HD Shell exceeds rental industry standards with an extra thick top sheet for extreme durability, scratch and chip resistance, and long-lasting performance for years of use. The HD Shell is not only easy to clean and maintain but also customizable with a specific area on the ski where rental shops can place its own logo sticker for increased recognition in the shop and on the slopes

SYSTEM

**360°**

360° Sidewall is a unique and effective sidewall solution to maximize performance while keeping the weight low. Pyramidal shaped sidewalls are positioned throughout the whole body of the ski, to increase vibration absorption and high-speed stability.

**FULL POWER CAP**

Full Power Cap is a traditional cap construction that is light, easy to turn and forgiving.

**FUSION X**

The Fusion X is Elan's next generation of high performance binding system. The new single connection design enables a smoother free flex between the ski and binding leading to easy turn initiation. At 30% lighter, the new pyramidal-shaped construction is reinforced with titanium for additional strength and direct, powerful edge-to-edge responsiveness. Skiing at high speeds is now more accurate due to direct power transmission.

**POWER SHIFT**

The PowerShift is a fully integrated binding system with the free flex plate-in- plate design. Unique PowerEdge Lifters provide direct energy transmission ensuring quick turn initiation and power throughout the turn. Vibration absorbers fore and aft on the plate dampen chatter to maximize edge hold and responsiveness.

**LIGHT SHIFT**

The LightShift System is a fully integrated binding system with a free flex plate-in-plate design.Constructed with light materials and a lean design profile, the LightShift system offers incredible weight reduction that allows skiers to maximize performance with less energy. Vibration absorbers fore and aft on the plate dampen chatter to maximize edge hold and responsiveness.

**JRS**

Jrs Junior System is modern, lightweight design, enabling unified flex of a ski., enabling easy learning and fast progression to a higher level. Incorporated locking rails make system extremely light and deliver extraordinary flex. Size adjusting scales are deepened, therefore well protected, what makes JrS Junior System easy to adjust and longlasting. Due to all attributes, JrS is a perfect match with U-Flex ski design, making skiing as easy as walking.

CORE

**R² FRAME WOODCORE**

The R² FRAME wood core is a unique tip-to-tail laminated wood core where a softer wood center is reinforced by a hardwood frame, allowing the core material to distribute forces evenly from tip to tail. This robust construction allows for a variety of flex patterns for different skiing types and giving skier pure skiing confidence feel.

**LAMINATED WOODCORE**

This tip-to-tail Laminated Woodcore is specially shaped for each model and size. Using different wood types in various combinations allows for the adjustment of the flex pattern for different types of performance. This extremely responsive and highly durable wood core transmits power directly to the edges and excels in a variety of conditions.

**AIRLITE LAMINATED W. WOODCORE**

The AirLite Laminated Woodcore is our lightest wood core construction, specially developed for high-performance, lightweight touring skis. Using carefully selected ultralight paulownia with strategically placed air pockets guarantees the optimal balance between lightness and strength, without sacrificing performance.

**TUBELITE WOODCORE**

To create the TubeLite Woodcore, two super lightweight Carbon tubes are inserted into a lightweight laminated wood core. These tubes run the length of the ski following the arc of the side cut. They provide torsional stability and powerful rebound while allowing for material reduction of the core. The result is incredible lightweight response and stability.

**CHANNEL WOODCORE**

Specially designed for kids, where channels are cut into poplar core, delivering responsiveness and optimal flex at the same time.

**POWER WOODCORE**

The Power Wood Core features a power-frame composed of poplar that is vertically connected to laminates, a structure that provides increased torsional stability and responsiveness. This composite construction delivers enhanced edge hold in the tip and tail areas and a uniform flex throughout the length of the ski

REINFORCEMENT

**DUAL WOODCORE**

Dual Woodcore features two symmetrical wooden stringers placed on the outer edges of the ski core. This construction improves power transmission and edge hold while keeping ski easy to handle in various snow conditions.

**MONO WOODCORE**

The Mono Woodcore consists of a lightweight wood stringer in the middle section that provides enhanced edge-to-edge responsiveness and effortless carving.

**DUAL TI / TI2**

Dual Ti is a sandwiched wood core with 2 layers of titanium. The construction provides superior edge control and a progressive flex pattern for high performance skis.

**QUADROD REINFORCEMENT**

Expanded upon its TubeLite Woodcore, which features two full-length carbon rods placed in the core, adjacent to the edges and the shape of the sidecut, by adding two additional carbon rods to the center of the ski, one in the tip and one in the tail, resulting in QuadRod Technology. It delivers next level smoothness and grip, with a natural flex pattern for the perfect blend of playful, yet powerful performance.

**CARBON RODS**

Lightweight Carbon tubes inserted into the ski and run the length of the ski following the arc of the side cut. The carbon tubes provide torsional stability and powerful rebound while allowing for material reduction of the core. The result is incredible lightweight response and stability.

**CTI**

The CTI is the new generation of ski design construction for wider platform high performance skis. The lightweight design engages a layer of titanium with longitudinal carbon rods to provide torsional stability, a powerful rebound and smooth transitions from turn to turn.

BASE

**CARBON REINFORCED CONSTRUCTION**

One of the most innovative designs in adventure skiing, Elan's carbon reinforced construction is extremely lightweight and adds torsional rigidity to create superior performance.

**MONO TI**

The Mono Ti construction uses a single layer of titanium on top of the woodcore for increased performance and responsiveness.

**FIBREGLASS**

Fiberglass reinforcement optimizes the flex pattern and enhances torsional rigidity of the ski. The fiberglass is positioned either above or below the ski core and improves a skis structural integrity.

**NANO TECH RUNNING BASE**

Special running base, enriched with nano sized carbon particles for enhanced and easier treatment of running base, better heat dissipation, better wax absorption, outstanding gliding performances in various conditions and long life through less wear and tear.

**SINTERED BASE**

The special ultra-high molecular weight running base delivers excellent durability and superb gliding performance in variety of conditions

An incredible power lies in women who succeed to be mothers, sisters, friends, partners, and leaders; and who always find time for their passions and hobbies. Having fun on the snow is one of the greatest outlets for women, it harnesses a passion that has inspired us here at the W Studio for almost two decades to create and enhance skis that reflect your needs and wishes. We listen to your preferences and adopt technology that propels confidence in every turn. Our innovation is fed by your desire to bring laughter and energy in the mountains regardless of your skiing ability. Skiing is the freedom of expression, the energy of community and the moment to have the time of your life.

ALL MOUNTAIN  
INSOMNIA

## PROVIDING ALL DAY ENERGY AND FUN AT THE MOUNTAIN.

Getting the most out of your equipment, allows you to get the most out of your day. With the Elan Women's All Mountain skis, you can count on them anywhere on the mountain, from the first chair to the last. Made with Elan's strategically shaped Amphibio technology, every turn is entered with ease and exited with power for unrivaled all-mountain performance and versatility. Topped with the free-flexing Power Shift bindings, skiers are fueled with a constant source of energy and precision all day long.

### Amphibio Truline W Technology

Amphibio Truline W Technology is the most advanced asymmetrical ski design on the market for women, designed and tested by the Elan W Studio. The foundation is a leaner, more agile profile; structural material is strategically placed over the full length of the inside ski edge, providing more stability to power the turn, while less material is applied over the outside edge, allowing for quick and smooth perfection within each turn.

ALL MOUNTAIN  
INSOMNIA

## INSOMNIA ELITE TI POWER SHIFT

### Queen of the piste

The crown-wearing queen of power and precision, the Insomnia Elite is packed with edge-to-edge quickness, stability and carving capability through all turn shapes. This technology infused prodigy is guaranteed to leave arcs in the corduroy, no matter the shape or speed of your turn.

## RACE DAY DNA WITH ALL DAY PERFORMANCE

With the Elan Women's Ace skis, you can count on them on any slope, every day of the season. For more than 80 years, ski racing has been the pinnacle of competition in our sport. It is considered the true test of skiing skills and the ultimate proving ground for new products and innovations in our W Studio Ace collection. Featuring Elan's Ace Arrow Technology, every turn provides control and stability at the highest level of power for unrivaled carving performance and versatility. Topped with the Power Shift binding system, skiers are fueled with a constant source of energy and precision all day long.

### A R R O W T E C H

# ALL MOUNTAIN WILDCAT

## THE ULTIMATE COMPANION FOR CONFIDENCE AND ADVENTURE IN ANY SNOW CONDITION.

Designed by women, the Wildcat line is built to optimize and enhance the energy and performance of the female skier in any condition or terrain. As the closest bridge to the Ripstick W collection, the Wildcat fuses Elan's award-winning technologies, including the most advanced asymmetrical ski design for women - Amphibio Truline W Technology - with a fresh take on all-mountain skiing. By taking a modern approach to all-mountain skiing, the Wildcat delivers best-in-class versatility with finely selected wood cores on slightly wider chassiss' that host lightweight, structural carbon constructions for efficient energy transfer and power in every turn. The Wildcat was made just for you, to create good times anywhere on the mountain together.

### Amphibio Truline W Technology

Amphibio Truline W Technology is the most advanced asymmetrical ski design on the market for women, designed and tested by the Elan W Studio. The foundation is a leaner, more agile profile; structural material is strategically placed over the full length of the inside ski edge, providing more stability to power the turn, while less material is applied over the outside edge, allowing for quick and smooth perfection within each turn.

## WILDCAT 86 CX

### POWER SHIFT/FLAT

#### Mountain Lioness

As the widest ski in the series, the Wildcat 86 CX offers the best of both worlds; ready to take on soft, deep snow on the backside of the mountain, or dominate groomers with speed and stability.

W STUDIO  
BLACK EDITION

Where performance meets elegance, without compromise.

The Elan W Studio Black Edition collection is the peak of high performance skis. Elegant style and timeless design are merged with a state-of-the-art carbon construction that takes both Wildcats 76 C and 86 C and Ripstick 94 W performance and versatility to the next level delivering unmatched smoothness and power. Our best all-mountain and freeride skis just got stronger.

FREERIDE  
RIPSTICK W

## BUILT FOR THE TOUGHEST TERRAIN, CONDITIONS, AND SKIERS, THE NAME SAYS IT ALL.

The Elan Ripstick W collection is the ultimate freeskiing tool for experienced skiers looking to explore new terrain on the resort or go deeper into the backcountry, but we all know that some days call for cruising groomers with friends. The Ripstick W's versatile personality has traits to suit your everyday needs. The collection utilizes Elan's Amphibio Carbon Line technology elevating the asymmetrical design and tip to tail TubeLite wood core with additional strategic carbon reinforcements for greater edge grip and stability, while maintaining the playful persona to make the perfect turn in any condition.

## Carbon Line Technology

Amphibio Carbon Line technology is a combination of innovations that provide the best balance of lightweight construction with power and performance. Amphibio Carbon Line technology elevates the asymmetrical ski design to the next level by strategically locating carbon reinforcement over the inside edges of the skis providing more power in the turn, while carbon rods inserted into the woodcore maximize weight savings and overall stability. The end result is an extremely lightweight high performance ski with uncompromised versatility and smooth performance.

## LIGHT-WEIGHT EQUIPMENT FOR WONDERLUST EXPLORING

The Elan Ripstick Tour was created for touring skiers with the intent to deliver the superior downhill performance of a freeride ski at a fraction of the weight for uphill efficiency. The series is designed from the ground up with the goal of pushing skiing performance to the maximum without losing focus on the functionality necessary for comfortable climbs. The engine that allows us to blend these concepts is Carbon Bridge Technology; a revolutionary solution where a single carbon rod is placed on top of the ski, to provide stability at speed and vibration absorption through the tip in variable snow, without a weight penalty.

### 360° Sidewall

Lightweight power  
transmission

### Carbon Reinforcement

For lightweight, stability &  
powerful rebound

### Laminated Woodcore

For energy,  
liveliness and  
lightness

### Carbon Bridge Technology

Next level stability

## RIPSTICK TOUR 94W

### Free(ride) spirit

Elan's Ripstick Tour 94 W is designed for adventurous women who want all of the benefits of lightweight technology in a wider chassis designed for bigger mountains and deeper snow. Expanding on the reassuring and adaptable features of Ripstick, on which our reputation has been built, Ripstick Tour 94 W benefits from an overall reduction in weight while maintaining excellent skiability.

ADVENTURE  
IBEX

## UPHILL EFFICIENCY MEETS POWER AND PERFORMANCE

The IBEX skis for women were designed for those who leave the chairlift behind and tap into the best source of energy available: human power. From daily exercise to weekend adventures, Ibex skis are built to reduce weight and enhance efficiency with the combination of Elan's Tubelite woodcore and Bridge Technology for power and efficiency. Up or down, Elan's new adventure series raises the bar in high performance touring skis.

## ALWAYS IN BALANCE, ALWAYS IN CONTROL

At Elan, skiing is more than a sport; it's a lifestyle. Whether you ride a chairlift once a year or aspire to summit the highest peaks in the world, it's all about experiencing the good times with friends and family. The spirit of our brand is inspired by the purest form of winter joy; from the powder days, to carving turns in perfect corduroy, from sharing the chairlift in the sunshine with friends, to toasting a day shared on the slopes together at après. Skiing is made of countless priceless moments. In effort to harmonize these moments with the feelings and motion of skiing, Elan developed this category designed to make good skiers and good times, even better. Elan Element skis simplify skiing with every turn through balance and control. When speed and skill progress, the Groove Tech, Parabolic Rocker and Power Shell technologies harmonize to boost confidence and thus progression with the sport, leading to lifelong skiers and ultimately always good times.

### G R O O V E T E C H

#### Groove Technology

Ultimate confidence booster while providing balance, control and ease.

#### Power Shell

Great stability without adding weight to the ski,

#### Parabolic Rocker

Easy turning, less effort

## ELEMENT W WHITE LIGHT SHIFT

### Love at first carve

The Element skis will boost your confidence everyday on snow. They bring harmony to the skiing experience, with a constant source of balance and control to link turns all day long.
