

A skier in a blue and black jacket, black helmet, and goggles is captured in a dynamic, low-angle shot while skiing down a snowy slope. The skier is leaning forward, and a large spray of snow is kicked up behind them, creating a sense of motion and speed. The background is a bright, overcast sky.

## SEASON 24/25

**HEAD**<sup>®</sup>  
.COM

**OUT THERE, YOU LEARN THINGS.**

**SET A TARGET AND SEE HOW FAR YOU CAN GO.  
START WITH A GREEN RUN, PROGRESS TO A RACE  
RUN AND TRY EVERYTHING IN BETWEEN.**

Can you be first at the top - and last to leave?  
Can you master that movement?  
Can you achieve new goals?

There are infinite frontiers to discover, new problems to solve.  
Embrace the solitude and connect with nature.  
Or connect with friends and experience it together.  
Rise to the challenges, push yourself, feel alive.  
Out there, it takes soul, drive and dependable equipment to thrive.

**THIS IS HEAD WINTERSPORTS 24/25.**

# CREATING A CAPSULE

HEAD's new touring collection has two central pillars; superlight construction for a speedy ascent, and ultimate skiability to enjoy the way down. Cycles of meticulous engineering, extreme testing and rigorous feedback have yielded a collection of hardgoods that does not compromise on weight or performance, together they make up the touring solution.

## CRUX SKI

Nothing was held back when designing the CRUX skiline. The ski is the culmination of decades of experience combined with bold new engineering. The wood core is profiled to remove unnecessary weight, while the Topless Tech exposes the intricate all new Triaxial Carbon Jacket construction.

## ALMONTE BINDING

Named after Tyrolia's original touring binding in 1928, the modern Almonte tech binding is lightweight, easy to use, dependable and eco-conscious (all plastic parts are made from renewable raw material).

## CRUX BOOT

In Altivole, Italy, HEAD's ski boot design team worked with an international network of mountain guides to develop a no-compromise boot, with equal performance on the ascent and descent. High-performance recycled plastics and bio-plastics are integrated into the construction.

## ACCESSORIES

Attention has been paid to every specialist piece in the collection, including the CRUX carbon touring pole and CX backpack, loaded with touring specific features.

TOURING

# CRUX

The all new CRUX is the touring solution, uphill or downhill, the new collection does it all. CRUX has the answer to every challenge your backcountry mission throws at you.

## SUPERLIGHT EQUIPMENT, ULTIMATE SKIABILITY

The topsheet has been removed to save weight, while a Snow Free Coating repels snow.

## LYT TECH CONSTRUCTION

Less weight equals more efficiency in the skin track and more energy in the tank for the descent.

## GRAPHENE AND KARUBA WOOD CORE

Incredible power to weight ratio with strong dampening qualities.

## FULL TRIAXIAL CARBON JACKET

Fibers woven in three angles provide exceptional torsional rigidity.

RACE

# WORLD CUP REBELS

The Race Performance collection features tried and tested geometry merged with cutting-edge technology. Perfect for expert racers, who demand new levels of speed and control.

## RACING TECHNOLOGY

Feel the power of the same technologies used by our elite athletes, like EMC, GRAPHENE and TITANAL®.

## TIP DESIGN

Narrower tip area for easier and less aggressive turn initiation, with an integrated tip protector.

## SIDECUT

Longer radius geometries give a stable, predictable feel when you are racing, particularly on the e-Speed Pro.

PERFORMANCE

# SUPERSHAPE

Lean into progressive engineering with this new line designed for power and pure performance. Supershape brings race to the piste. Honed and evolved over generations, this is future carving.

## BETTER BALANCE PR BASE

Providing a constant ramp angle for easy turn initiation and high speed stability.

## CROSSFORCE CARBON CONSTRUCTION

Direct contact from the binding to the ski's carbon construction for ultimate responsiveness.

## WORLD CUP SANDWICH CAP CONSTRUCTION

A balanced mix of wood, Graphene and titanal provides extreme responsiveness.

## ENERGY MANAGEMENT CIRCUIT

EMC is HEAD's proprietary technology that filters out negative vibrations.

FREESKI

# KORE

KORE has a legacy of cutting-edge freeride performance. Utilizing CARBON and GRAPHENE to reduce weight and increase performance, KORE lets you immerse yourself in the backcountry.

## CARBON SANDWICH CAP CONSTRUCTION

Graphene, two carbon layers and a Karuba-Poplar woodcore make up the ultimate freeride construction.

## PROGRESSIVE CHAMFER

A crud-cutting chamfered top edge improves durability and gives a more playful feel.

## TIP AND TAIL ROCKER

Tuned for each model, dual rocker floats over all snow with ease.

FRESKI

# OBLIVION

When HEAD's most creative freeskiers collaborated with our top designers and technologists, OBLIVION was re-born. The ultimate expression of progression across the mountain.

## RECYCLED PET-WOOD CORE

This innovative core uses poplar wood with recycled PET bottle stringers. A lightweight and low environmental impact construction.

## PROFESSIONAL PERFORMANCE AND GRAPHICS

All elements of the ski, inside and out, have been developed in collaboration with Cole Richardson.

## TWIN-TIP CONSTRUCTION

Sandwich Carbon Construction with TNT Rocker for more durability but plenty of playfulness in the tip and tail.

## CARBON CONSTRUCTION

Carbon layers throughout the ski improve stability and performance while simultaneously saving weight.

ALL MOUNTAIN

# KORE X

The younger, all mountain sibling to our cutting-edge freeride skis, KORE X inspires smooth, lively turns on and off the slopes. All mountain, full confidence.

## SANDWICH CAP CONSTRUCTION

Easy skiability due to the superlite Sandwich Cap Construction.

## LYT POWER RAIL BASE

For set option with the Protector binding.

## DURABLE TOPSHEET

Topsheet with awesome matt wood like structure for high durability.

ALL MOUNTAIN

WOMEN'S

# JOY

For 15 years, the JOY range has set the standard for bespoke female equipment. Featuring geometry that is biomechanically tuned for women, JOY is built from the bases up for women who crave to carve.

## BETTER BALANCE PR BASE

Providing a constant ramp angle for easy turn initiation and high speed stability.

## FEMALE SPECIFIC FLEX PROFILE

Softer flex in the middle to give a homogeneous pressure distribution.

## SHOVEL DESIGN

Slimmed down shovel design for a smoother turn initiation and more control.

## SIDECUT

Longer radius sidecut gives a more stable ski, for confident edge to edge transitions.

WOMEN'S

## POWER JOY

# SKI CONSTRUCTIONS

## WORLD CUP SANDWICH CAP CONSTRUCTION

The Worldcup Sandwich Cap Construction, is developed with the most sophisticated materials known to man. With a balanced mix of light Graphene and extra Titanal® layers, the ski combines the most extreme agility with extreme responsiveness, ultimate performance.

- |                                |                           |
|--------------------------------|---------------------------|
| 1 Top Sheet/Crossforce Carbon* | 7 Sidewall                |
| 2 Glass Fiber Fleece           | 8 Edge                    |
| 3 Titanal® Layer               | 9 Dampening Layer         |
| 4 Glass Fiber                  | 10 Reinforced Glass Fiber |
| 5 Wood Core                    | 11 Base                   |
| 6 Graphene                     |                           |

\*Only valid for Supershape skis.

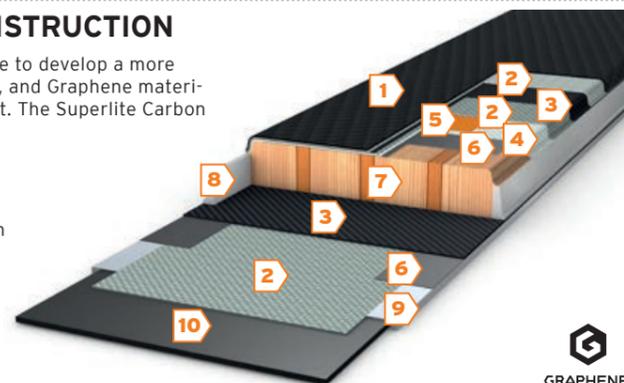

Relevant HEAD skis: all Supershape skis, Worldcup Rebels e-Speed (Pro), Worldcup Rebels e-Race (Pro), Worldcup Rebels e-SL (Pro), Worldcup Rebels e.SLR, Worldcup Rebels e.GSR, Power Joy

## SUPERLITE CARBON SANDWICH CAP CONSTRUCTION

By combining the lightest and strongest materials, we have been able to develop a more stable, robust and lightweight ski. Utilizing karuba-ash wood, carbon, and Graphene materials guarantees optimal performance with the lightest possible weight. The Superlite Carbon Sandwich Cap Construction guarantees the ultimate skiing pleasure.

- |                        |                        |
|------------------------|------------------------|
| 1 Top Sheet            | 6 Dampening Layer      |
| 2 Glass Fiber          | 7 Wood Core Karuba-Ash |
| 3 Carbon               | 8 Sidewall             |
| 4 Diagonal Glass Fiber | 9 Edge                 |
| 5 Graphene             | 10 Base                |

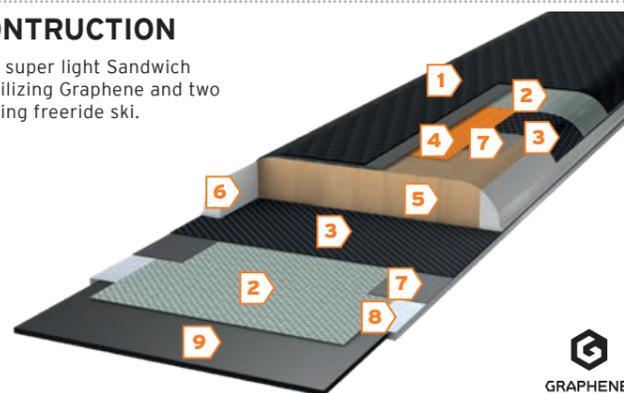

Relevant HEAD skis: Shape e-V10, Shape e-V8, Super Joy, Total Joy

## MULTILAYER CARBON SANDWICH CAP CONSTRUCTION

Developed from the most sophisticated materials known to man: the super light Sandwich Construction makes up one of the world's lightest freeride skis by utilizing Graphene and two different carbonlayers. The ultimate construction for a high performing freeride ski.

- |                           |                   |
|---------------------------|-------------------|
| 1 Top Sheet               | 6 Sidewall        |
| 2 Glass Fiber             | 7 Dampening Layer |
| 3 Carbon                  | 8 Edge            |
| 4 Graphene                | 9 Base            |
| 5 Karuba-Poplar Wood Core |                   |

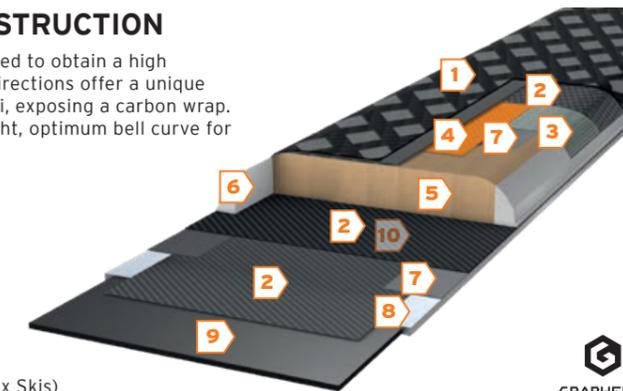

Relevant HEAD skis: all KORE & KORE W skis

## TRIAxIAL CARBON SANDWICH CAP CONSTRUCTION

Full Triaxial Carbon Jacket is a reinforcement fabric that is optimized to obtain a high strength-to-weight ratio. Carbon fibers weaved in three different directions offer a unique construction method where the top sheet is removed on the full ski, exposing a carbon wrap. Better power transmission of forces onto the slopes, ultralightweight, optimum bell curve for perfect flex behaviour.

- |                           |                                 |
|---------------------------|---------------------------------|
| 1 Triaxial Carbon Jacket* | 6 Sidewall                      |
| 2 Carbon                  | 7 Dampening Layer               |
| 3 Glass Fiber             | 8 Edge                          |
| 4 Graphene                | 9 Base                          |
| 5 Karuba Wood Core*       | 10 Glass Fiber (only Crux Skis) |

\*Crux: 1 Topsheet 5 Poplar Wood Core

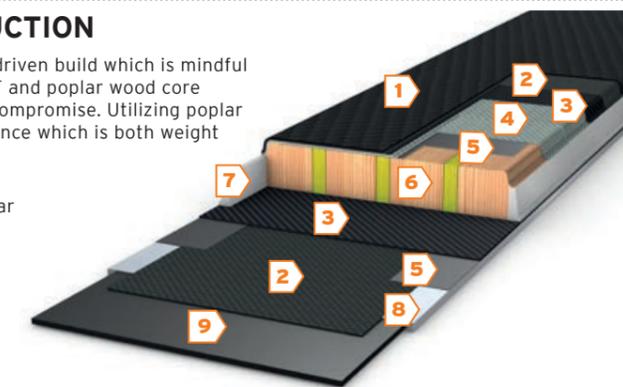

Relevant HEAD skis: Crux Pro, Crux

## PET-WOOD CORE CARBON CAP CONSTRUCTION

The PET-Wood Core Carbon Sandwich Cap construction, is an eco-driven build which is mindful of sustainability while still delivering superb skiing. The hybrid PET and poplar wood core delivers a stable, robust and lightweight ski with no performance compromise. Utilizing poplar wood, recycled PET plastics and carbon provides optimal performance which is both weight and environmentally conscious.

- |                        |                        |
|------------------------|------------------------|
| 1 Top Sheet            | 6 PET-Wood Core Poplar |
| 2 Carbon               | 7 Sidewall             |
| 3 Carbon Biaxial       | 8 Edge                 |
| 4 Diagonal Glass Fiber | 9 Base                 |
| 5 Dampening Layer      |                        |

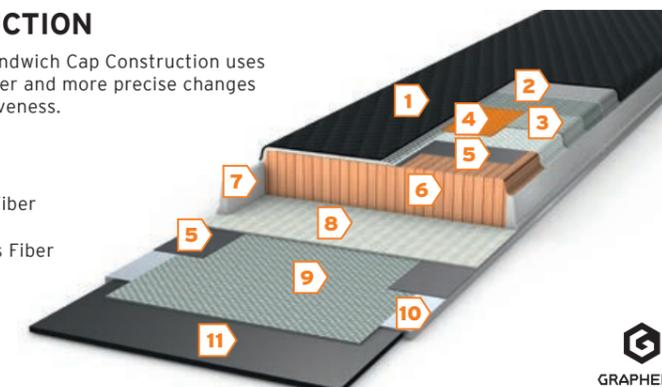

Relevant HEAD skis: Oblivion 116, Oblivion 102

## SUPERLITE SANDWICH CAP CONSTRUCTION

Thanks to the unique properties of Graphene, the Superlite Sandwich Cap Construction uses fewer materials but increases its responsiveness, allowing faster and more precise changes form edge-to-edge. The ultimate ski for flotation and responsiveness.

- |                      |                          |
|----------------------|--------------------------|
| 1 Top Sheet          | 7 Sidewall               |
| 2 Glass Fiber Fleece | 8 Diagonal Glass Fiber   |

## SUPERLITE POWER SIDEWALL JACKET WOOD COMPOSITE CORE

A vertically laminated wood core with a PU injected sock around it. The cap construction with ABS Sidewalls insures complete protection from mechanical damage. The wood insures stability against vibrations and a smooth ride for target groups looking for ambitious performance.

- |                        |                           |
|------------------------|---------------------------|

TOURING

# ALMONTE 12 PT

## THE ULTIMATE PIN BINDING

Experience the super-lightness on the ascent and high-performance on the descent. With intuitive handling, now it's your turn to explore new paths and set your very own track.

### LIGHTWEIGHT DESIGN

325 g/pc. incl. brake & screws.

### SUSTAINABLE MATERIALS

all plastic parts are made from renewable raw material.

### EASY STEP-IN

for an effortless & fast entry.

### INTUITIVE HANDLING

of hike & ski mode with AUTOMATIC BRAKE LOCK & an isolated mechanism to prevent icing.

PERFORMANCE

# PROTECTOR PR 13 GW

## RECOMMENDED BY YOUR KNEES

Featuring Full Heel Release technology, the PROTECTOR binding can reduce stress on the anterior cruciate ligament by more than 50%\*, in the event of a fall, significantly reducing the chance of injuries.

\* finite element model simulations by University of Innsbruck:  
 "Lateral Heel Release Reduces ACL strain in Simulated Backward Twisting Falls"

### REDUCES ACL STRAIN

by more than 50%\*.

### FULL HEEL RELEASE FUNCTION

intelligent 180° release (horizontally & vertically).

### BOOT COMPATIBILITY

works with Alpine & GripWalk ski boots.

### SAME PERFORMANCE & CONVENIENCE

as our conventional bindings plus maximum safety.

PERFORMANCE

# BOOT BINDING COMPATIBILITY

**MARKING ON THE PRODUCT: \***

A	A GRIP WALK	A GRIP WALK	A MN	CA GRIP WALK	PIN BINDING
---	----------------	----------------	---------	-----------------	-------------

**COMPATIBLE BOOT STANDARDS:**

Alpine Adult sole (ISO 5355 - TYPE A)	✓	✓	✓	✓	✓
GRIP WALK Walk Adult sole (ISO 23223 - TYPE A)		✓	✓	✓	✓***
Alpine Children sole (ISO 5355 - TYPE C)				✓	
GRIP WALK Walk Children sole (ISO 23223 - TYPE C)				✓	
Touring sole (ISO 9523)			✓		✓***
Non compliant soles with tech. inserts					✓****

**BINDING STANDARD:**

ISO 9462	ISO 9462	ISO 9462	ISO 9462 ISO 13992	ISO 9462	no standard
----------	----------	----------	-----------------------	----------	-------------

\* There are older ski bindings/ski boots without marking. Here the technician needs to check boot compatibility according the corresponding tech manual.  
 \*\* Screwdriver icon indicates that the toe height needs to be adjusted by the technician. e.g. **A MN**  
 \*\*\* Boot needs to have tech inserts. Compatibility with tech bindings might be limited. Check recommendations of the binding and boot manufacturer.  
 \*\*\*\* Compatibility with tech bindings might be limited. Check recommendations of the binding and boot manufacturer.  
 Although there is no Type A & C standard in ISO 9523 - MN bindings are marked with A to avoid possibly installing of a Type C Alpine or Walk boot in those bindings.

## TOURING

# CRUX PRO

Featuring all new Power LYT design, the CRUX Boot line delivers incredible skiability in a super strong, super light package. Accept no compromise in the ascent or descent, this is the touring solution.

### POWER LYT DESIGN

#### COMFORT SKIN SHELL

Designed to wrap the foot with a balanced and comfortable 99 mm touring last. The reactive material provides minimum thickness and precise adaptation to the foot.

#### CONTROL CUFF

Featuring 2 buckles and a high profile for superior ski control even in the most demanding conditions and speeds.

#### LYT DYNAMIC FRAME

Connects the shell, cuff and ski-hike device, providing the direct and powerful energy transmission. The Vibram Durastep rockered sole provides smooth foot rolling.

### CRUX PRO HP

Customizable liner, the material's density ensure the perfect mold in the most critical area of the boot. Reinforced tongue and upper cuff. Tongue and cuff velcro for extra spoiler.

RACE

# RAPTOR

Simply the most successful race boot in World Cup history and still the equipment of choice for the world's fastest racers. This is ultimate speed in a tailored, precise fit.

## BUCKLE POSITIONING

The higher screw-racing buckle and compact shell won't touch the snow when achieving high edge angles.

## CUFF ALIGNMENT

Gives more precise adjustment, more stable connection and less friction between shell and cuff.

## EXTENDED TOE BOX AND MATERIAL

The extended toe box increases torsional rigidity and power transmission. The shell's PU material provide a more progressive flex, smooth rebound and less vibration for better control.

## WCR BOOT BOARD

The all-new WCR boot board has no varus, which allows for rapid and easy fitting.

HIGH PERFORMANCE

# FORMULA

A high-performance boot designed for expert skiers looking for unbeatable comfort and foot wrapping. Formula comes in 98mm and 100mm last sizes to fit all feet and every terrain.

## SPINEFLEX BUCKLE

This unique buckle concept has a flexible element, that adapts to the shell profile, reducing pressure points and improving the fit and performance.

## CUFF ALIGNMENT

Gives more precise adjustment, more stable connection and less friction between shell and cuff.

## EXTENDED TOE BOX

A longer toe box increases torsional rigidity and power transmission. New design for a better balance and increased comfort.

## PU MATERIAL

The PU material gives more progressive flex, smooth rebound and less vibration for better control.

HIGH PERFORMANCE

## ALL MOUNTAIN

# EDGE

Evolved over 20 years into the most popular boot we've ever made. With the new EZ tech shell, skiers experience EZ-ON, EZ-WALK and EZ-SKI, for every skier and every slope.

### EZ TECH SHELL

The last and technology in the new shell is the culmination of 6 generations of EDGE boots.

#### EZ-ON

The new Edge Shell provides the easiest step in ever for a four buckle boot.

#### EZ-WALK

The EZ-WALK switch releases the upper cuff to rotate freely and combines with the Grip-Walk sole for easy walking.

#### EZ-SKI

The unique Hi-Top lower shell plus the Power flex ensures a direct energy transfer from skier to ski, to amplifying ski control, reducing fatigue and increasing fun.

EZ TECH SHELL

JUNIOR

# RAPTOR JUNIOR

**BUCKLE POSITIONING**

The higher screw racing buckle and compact shell don't touch the snow when achieving high edge angles.

**CUFF ALIGNMENT**

Gives more precise adjustment, more stable connection and less friction between shell and cuff.

**EXTENDED TOE BOX AND MATERIAL**

The extended toe box increases torsional rigidity and power transmission. The shell's PU material provide a more progressive flex, smooth rebound and less vibration.

**WCR BOOT BOARD**

The WCR boot board has no varus, which allows for rapid and easy fitting.

# J KIDS BOOTS

**JR. HI-TOP**

Higher tongue profile and asymmetrical lateral support.

**TWO PHASE FLEX**

Gradual and natural centered balance.

**NATURAL KID STANCE**

**VARIO LAST DESIGN**

HEAD's Anatomical last has been developed to accommodate the natural growth of kid's feet: Wider last on small sizes.

R-SERIES

# RADAR

Award-winning helmet with a fully integrated visor that combines the benefits of wearing a goggle with that of having a visor helmet. Lenses can be exchanged in seconds and are available in several configurations, including our contrast-enhancing 5K lens technology. Our Sphere Fit system assures a good fit and adjustable ventilation the perfect inner helmet climate.

## ■ RAPID LENS EXCHANGE SYSTEM

to adapt yourself to changing weather conditions on the go.

## ■ SPHERE FIT SYSTEM WITH BOA®

The patented Sphere Fit system is a free-hanging fit system. It wraps around the head like a beanie, creating a snug and comfortable fit without applying any pressure.

## ■ RETHINK EDITION

This product is made from eco-friendly materials and promotes responsible consumption while ensuring user safety and comfort.

**RAPID LENS EXCHANGE SYSTEM**

**STEP 1**

Pull out the lens with one hand.

**STEP 2**

To remove the lens, push out the fixation device with your thumb until the lens is loose. Be careful that the elastomer doesn't snap back. Remove on both sides.

**STEP 3**

To attach the new lens, pull out the elastomer before clicking in the new lens. Do it on both sides.

## C-SERIES

# CINEMA

Introducing the new HEAD CINEMA helmet with an innovative visor solution that will take your riding experience to the next level! With its sleek design and advanced features, this helmet is the perfect choice for any adventure seeker. The unique visor system allows for easy adjustments to optimize visibility, while the lightweight construction with Sphere Fit ensures maximum comfort and mobility.

### THE LENS

The CINEMA features an innovative, free-hanging visor construction that can be operated with one hand. Several lens options are available, which can be easily exchanged with a simple click.

### THE FIT

Featuring our patented Sphere Fit technology, the CINEMA assures a perfect, comfortable fit for any individual head shape. The integrated beanie liner is super comfortable, while the windshield protects the forehead from the wind.

### THE DESIGN

Modern, timeless & functional - the new CINEMA offers a slim and stylish look. The free-hanging visor solution adds a bold statement to the design and is easy to operate at the same time.

**MIPS - BRAIN PROTECTION SYSTEM**

**1.** When you hit your head in a fall, it often creates a rotational motion in your brain.

**2.** MIPS Low Friction Layer allows the head to move 10-15mm, in all directions, inside the helmet which reduces the rotational motion to the brain.

**3.** The MIPS brain protection system is designed to reduce strain to the brain.

# HELMET TECHNOLOGY

## HARDSHELL TECHNOLOGY

This helmet technology is outstanding in longevity and impact protection. For this reason we use it in our race and rental helmets.

## CONSTRUCTION

### DUAL DENSITY CORE

This patented core technology is made from EPS with dual densities. This increases the helmets performance so it passes the FIS RH 2013 standard.

### TOOLFREE CHINGUARD

The angle of our all-new Toolfree Chinguard can be adjusted individually, without using any tools. The chinguard can also be taken off, when not needed for training, or racing gates.

### 360° MICROSHELL

The 360° Microshell is a polycarbonate layer, which three-dimensionally wraps around the lower helmet lip, that prevents scratches and dents in the helmet's foam.

### MICROSHELL

The Microshell is a polycarbonate layer that prevents scratches and dents in the foam.

### MIPS

The MIPS Brain Protection System is a helmet-integrated, low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.

## VENTILATION

### ADJUSTABLE VENTILATION

The opening of the ventilation ducts on the top of the helmet may be adjusted continuously by means of a slide control.

### THERMAL VENTILATION

Thermal Ventilation is our automatic ventilation system which leads warm air away from the head to the outside without allowing any cold air to the inside.

### ACTIVE BOTTOM EDGE

An Active Bottom Edge in HEAD helmets reduces goggle fogging by delivering active airflow. It does this by allowing air to be drawn from the goggles through the helmet.

## IN-MOLD TECHNOLOGY

The shock absorbing inner EPS layer of this technology is injected into the hard outer polycarbonate layer to create a single comprehensive unit that provides perfect protection at a reduced weight.

## VENTURI EFFECT

The Venturi Effect creates the ideal inner helmet climate. It does so when air passing over the helmet draws out heat and moisture from the helmets inside.

## LINING

### MICROFUR

Microfur is both warming and comfortable on the skin. As a helmet lining it creates the perfect fit and feel for all-day shredding.

### MICROFLEECE

The soft microfleece material has several functions: It feels good, draws moisture from the skin and transports it away from the head.

### BEANIE LINER

The soft microfleece material of the Beanie Liner adapts perfectly to the head and thus avoids any bruises and the unpleasant entering of cold air. Molded-in mesh zones let heat and moisture escape to the outside and, together with the ventilation system, ensure a pleasant head climate.

### COMFORT ZONE LINER

Soft liner pads provide perfect fit & comfort at a fraction of the weight.

### WINDSHIELD LINER

A thin cover on the forehead that keeps your head protected from the airstream.

### KID SPECIFIC LINER

This lining is specifically designed for kids, fully covered with soft microfleece, providing perfect fit & comfort at a fraction of the weight.

## EARPADS & FITTING

### NECKGATOR

The Neckgator provides comfort and warmth to the helmet wearer. It adds comfort, fit and excludes the elements.

### REMOVABLE EARPADS/NECKGATOR

These ear pads and/or neckgator can be removed to suit the variable weather conditions and for cleaning.

## VISOR CONSTRUCTION

HEAD's Visor Construction is a wind-sealed UV protective shield that allows skiers to ride wearing prescription glasses. Like on a motorcycle helmet the visor can be pulled down to protect the eyes while riding.

## CHANGEABLE ADAPTER PLATES

Use the flat adapter plates with optimized acoustics for speed disciplines, the chin guard adapter for slalom disciplines.

## SPHERE FIT

The patented Sphere Fit system is a free-hanging fit system. It wraps around the head like a beanie, creating a snug and comfortable fit without applying any pressure.

## BOA®

The BOA® Fit System allows you to adapt the helmet perfectly to your head, creating a snug and comfortable fit without any pressure.

## 360° BOA® FIT

The 360° Fit System by BOA® evenly adjusts the fit of the helmet to all head shapes

## HEAD 3D FIT

HEAD 3D Fit allows an exact horizontal as well as vertical adjustment of the helmet to the shape of your head.

## HEAD 2D FIT

The size adjustment system may be varied horizontally in order to individually adjust the helmet to your head.

## METAL CHINSTRAP BUCKLE

The Metal Chinstrap Buckle is both durable and tactile. Made from metal it also adds to the look of a HEAD helmet.

## FIDLOCK BUCKLE

The magnets of this buckle close automatically and can be opened easily and conveniently by sliding the buckle laterally with just one hand. Even with gloves on, opening and closing the helmet will only take a moment.

## CERTIFICATION

### EN 1077:2007 CLASS B

EN 1077 is the European standard for ski & snowboard helmets, taking into account the results of collision tests to ascertain dampening and puncture resistant qualities of the outer shell. Class B of this certificate certifies helmets with soft ear protectors.

### EN 1077:2007 CLASS A

The certification procedure for Class A is used for racing helmets with hard ear protectors, requiring high standards of puncture resistance.

### EN 174:2001

European standard for Personal eye-protection - Ski goggles for downhill skiing.

### ASTM F 2040

The North American equivalent to the European CE-Test uses comparable methods.

### FIS RH 2013

These helmets comply with FIS GS/SG/DH helmet regulations.

# VISORS & LENSES

## INTEGRATED VISOR SYSTEM

The innovative combination of a visor helmet with the advantages of wearing a goggle are integrated into a product which is outstanding in terms of fit, style and performance. The visor automatically adapts to the wearers face and seals off wind and water.

## DOUBLE LENS VISOR

The Double Lens Visor is ventilated, which prevents the lens from fogging. It provides 100% UV protection. Therefore, it is the ideal solution for mountain sports.

## RAPID LENS EXCHANGE SYSTEM

Lenses can be swapped on the go with only a click. Adapt yourself to changing weather in no time!

## EASYCLICK LENS EXCHANGE SYSTEM

The lens can be exchanged with a simple click mechanism on both sides. A small colored dot indicates if the lens is securely locked with the outriggers.

## VENTILATED LENS

Channels off air from the lens into the helmets ventilation system and therefore prevents fogging.

## PHOTOCHROMIC LENS

This lens automatically adapts its lens tone between category S1 to S3, depending on the weather condition. The lens is toned down in bright, sunny conditions and allows more light to enter the eyes in cloudy, overcast weather conditions.

## 5K LENS

5K enhances contrast and boosts color brilliance by filtering specific wave lengths of the visual spectrum, therefore revealing more details and assuring a safer, less tiring on-snow experience in any weather condition.

	S3 	S2 	S1 	S0 
<b>KNIGHT/QUEEN</b>	Bright and sunny conditions require a dimming lens tone.	Versatile lens for changeable weather conditions.	For cloudy or snowy days on the mountain.	Clear lens for night touring.

NEVES

# NEVES

Our new goggle model NEVES ticks all boxes of a modern-looking and functional winter sports goggle. Through progressive industrial design, we achieved an extra wide lens with optimized angles to read every detail of the terrain. This goggle integrates seamlessly into the helmet and its wide contact area on the face makes it super comfortable to wear all day. It is available in two sizes, medium and large, including proportional frame and strap sizing to fit multiple face shapes.

## THE LENS - UNLIMITED VISIBILITY

read every detail of the terrain with its large lens paired with high-definition 5K technology.\*

## THE FIT - SEAMLESS INTEGRATION

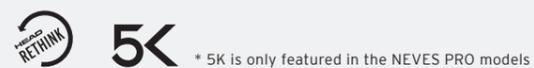

combining unparalleled fit and seamless helmet integration.

## THE DESIGN - PROPORTIONAL SIZING

bold, contemporary goggle design available in medium and large to fit multiple face shapes.

## RETHINK EDITION

This product is made from eco-friendly materials and promotes responsible consumption while ensuring user safety and comfort.

CONTEX

# CONTEX

This goggle line offers everything you need for any day on the mountain, while being easy on the budget at the same time. The CONTEX features an exchangeable double lens with flashy mirrors, supreme anti-fog, and UV protection - packed in modern frame design. The CONTEX PRO features the contrast-enhancing 5K lens technology as well as a laminated double lens LDL. Every model in this line is available in three sizes small, medium and large.

## LAMINATED DOUBLE LENS

increases the field of vision by 15%, by connecting the inner lens to the outer lens through a lamination process.

## DYNAMIC VENTILATION SYSTEM

is designed to allow air to enter the goggle from three sides, therefore creating an airstream that assures a perfect climate inside the goggle.

## RETHINK EDITION

This product is made from eco-friendly materials and promotes responsible consumption while ensuring user safety and comfort.

# GOGGLE TECHNOLOGY

## LENS

### 5K LENS

5K enhances contrast and boosts color brilliance by filtering specific wave lengths of the visual spectrum, therefore revealing more details and assuring a safer, less tiring on-snow experience in any weather condition.

### PHOTOCHROMIC LENS

This lens automatically adapts its lens tone between category S1 to S3, depending on the weather condition. The lens is toned down in bright, sunny conditions and allows more light to enter the eyes in cloudy, overcast weather conditions.

### LAMINATED DOUBLE LENS (LDL)

By connecting the inner lens to the outer lens through a lamination process, there is no gap between the two lenses. This increases the field of vision by 15%. A special anti-fog coating is applied to assure a clear vision in any condition.

### SCRATCH RESISTANT

The mirror coating of this lens is applied on the inside. This protects the coating from scratching or wearing off over time.

### DOUBLE LENS

The polycarbonate double lens is a lightweight lens, that provides 100% UV protection and is 10 times more impact-resistant than conventional glass or plastic. It is therefore the ideal lens for mountain sports.

## MATERIAL

### WINDSEALED MAIN FRAME

Windseal Foam is a wind retardant foam. We use it in our downhill race goggles to exclude the rushing wind of racing.

### VENTING FOAM

Venting Foam allows the transfer of air, heat and moisture. When used in our goggles it prevents fogging and creates the ideal climate inside a pair of goggles.

### TRIPLE LAYER FOAM

Dual-density comfort foam with microfleece is a bonded foam with a soft fleece for added comfort. The two foams serve different purposes, including anti-fogging, climate regulation and padding while the fleece creates the ideal comfort layer between goggle and skin.

### UV400 & ANTI FOG

UV400 & Anti Fog refers to the intense UV protective qualities of HEAD lenses and their ability to minimize fogging. The light on the mountain is intense so you need the best protection possible as well as anti-fogging qualities to maintain the best visibility.

### FMR

FMR is HEAD's flashy mirror finish to their lenses providing added protection against sunlight. Light on the mountain is intense so riders need the best protection possible.

### TORIC LENS

Toric lenses are curved in a way which avoids optical distortion and adds a bold, modern look to the goggle.

### SPHERICAL LENS

A Spherical Lens has a consistent vertical and horizontal curve for a true and clear field of vision. It is both functional and looks great.

### CYLINDRICAL LENS

The Cylindrical Lens is a flat lens with a single lateral curve that provides a superior field of vision. It also looks great!

### FILTER CATEGORY

S0: Clear lens for night touring.

S1: For cloudy or snowy days on the mountain.

S2: Versatile lens for changeable weather conditions.

S3: Bright and sunny conditions require a dimming lens tone.

### DOUBLE LAYER FOAM

Comfort Foam with microfleece is a single density foam that regulates a goggles inner climate, cushions and provides the perfect skin to goggle interface.

### EXTRA FACEFOAM

For customizing the fit of the goggle to your face, as well as creating the perfect match between helmet and goggle.

### COMFORT FOAM

Comfort Foam is a single density foam that allows for the ideal inner goggle climate. Comfortable with venting properties it is the ideal foam for goggles.

## FEATURES

### EXTREME WIDE FIELD OF VISION

HEAD's goggles with an extra wide field of vision are perfect for racers, allowing a tight aerodynamic tuck without impaired vision.

### MAGNETIC LENS EXCHANGE

The magnetic lens exchange solution enables you to swap lenses on the go. It automatically locks the lens in place and assures that you can adapt yourself to changing weather conditions quick and easily.

### SPEED SNAP LENS EXCHANGE

Speed Snap Lens Exchange is a fast and easy lens exchange system. Lenses snap in and out quickly and easily allowing a rider to keep up with the changing light conditions.

### INTERCHANGEABLE LENS EXCHANGE

Interchangeable Lenses means that they can be changed to suit light conditions or when damaged. This increases the longevity of a goggle frame and allows for flexibility.

### WIND SEAL

Protects the goggle from wind and water entering the inside.

### SILICONE LAYER

The Silicone Layer provides added grip between a goggle strap and on-mountain head wear. From helmets to beanies the Silicone Layer keeps goggles in place.

### OTG - OVER THE GLASSES

Prescription glasses can be worn under the goggle, as it offers enough volume on the inside to intake glasses with a width up to 13 cm. The face foam is molded on the sides, to give space to the temples of the glasses.

## 3 SOLE LENGTHS FOR ALL SKIBOOT SIZES

How does its work?

### SKIBOOT

They are marked with black, yellow and silver color codes. HEAD ski boots are available as a fleet or as a high performance version.

289mm 23.0 - 26.0      329mm 27.0 - 30.0      365mm 31.0 - 34.0

>>> By selecting only the skiboot the correct skiset is automatically chosen.

**B MOST COMMON WEIGHTS AND HEIGHTS**

49-57 kg	149-157 cm
108-125 lbs	4'11"-5'1"
58-66 kg	158-166 cm
126-147 lbs	5'2"-5'5"
67-78 kg	167-178 cm
148-174 lbs	5'6"-5'10"
79-94 kg	179-194 cm
175-209 lbs	5'11"-6'4"
>95 kg	>195 cm
>210 lbs	>5'11"-6'4"

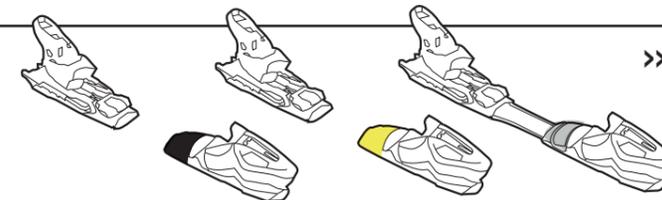

**A ONLY 3 BOOTSOLE LENGTHS**

**C NARROWS POSSIBLE DIN SETTINGS TO 4, 5 AND 6**

O	91	380		11,00		
P	105	452		12,00		
Q	121	520				
R	137	588				

### BINDING

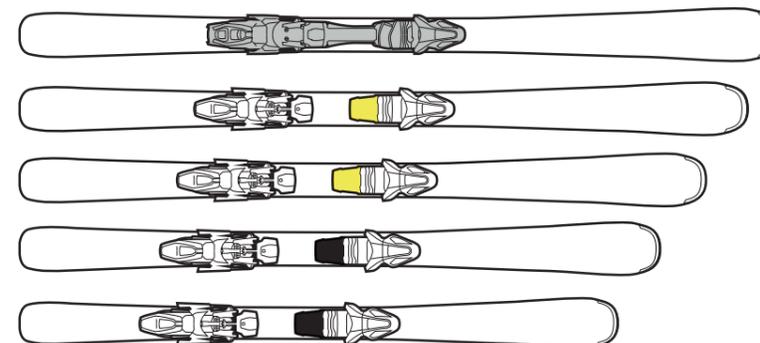

>>> The color code speeds up the selection of matching the binding with the boot.

### SKI

HEAD skis are available in 5 different sizes. Ambition Pro woodcore, 140cm to 180cm and Ambition PU core, 130cm to 170cm. All skis can be used with the BYS System.

>>> With color codes, you can easily identify the right HEAD setup immediately. All settings are pre-adjusted.

Among the bindings you can choose between the color coded fix mounted toe- and heel-piece or the adjustable SP binding (track system).

Organizing your fleet not only by size but also by preset DIN settings (4, 5, and 6) will allow you to speed up your process.

# TECHNOLOGY FEATURES SKI

**Allride Rocker:** Rocker that is equally at home on bulletproof snow as it is in powder. This profile uses early rise in the tip with regular camber throughout the rest of the ski. 20% rocker – 80% camber.

**Crossforce Carbon Construction:** Crossforce Carbon Construction is a unique construction method where the top sheet is removed under the binding, exposing a carbon wrap which the binding is mounted directly onto. Better power transmission of forces onto the slopes.

**Diecut UHM C Base:** This durable workhorse base material is dedicated to all forms of skiing. Diecuts are added for flare.

**E Base black:** Basic black never goes out of style, and it's always durable. Easy gliding is everyone's friend.

**EMC:** Energy Management Circuit – converts kinetic energy into electric energy, that then gets used to absorb negative vibrations.

**ERA 3.0 S:** “Sports version” of ERA 3.0 with a multifaceted ski designed with race innovation and inspiration, yet now with the addition of Rocker, Radius and Rebound. Totally new skiing experience with 10% rocker and 90% camber.

**ERA 3.0:** A masterful blend of three independently important technologies to make the ultimate allcountry skis. Rocker + Radius + Rebound = Rocker Done Right.

**ERA 2.0:** ERA 2.0 is the little brother of ERA 3.0 and is everything 3.0 has to offer as far as design, performance and geometry integration, but without the addition of “Rebound” with its piezoelectric elements.

**Full Triaxial Carbon Jacket:** Full Triaxial Carbon Jacket is a reinforcement fabric that is optimized to obtain a high strength-to-weight ratio. Carbon fibers weaved in three different directions offer a unique construction method where the top sheet is removed on the full ski, exposing a carbon wrap. Better power transmission of forces onto the slopes, Ultralightweight, Optimum bell curve for perfect flex behaviour.

**Multilayer Carbon Sandwich Cap Construction:** Superlight sandwich construction, triaxle weave of carbon layer combined with Graphene and additional carbon layer for more stability, make KORE one of the lightest ski in its category.

**Highly transparent UHM Base:** A high-density, determinedly durable base that allows gorgeous graphic details to shine through. The perfect combination of fashion and function.

**ISS - Independent Suspension System:** Elastomeric vibration killers located in the tip, tail and underfoot. The elastomers quiet the vibrations that are commonly associated with rockered skis. Underfoot, the vibrations are dampened to provide the skier with a smooth ride.

**Junior Power Frame:** A geometric ski shape that provides structural strength to the outer edges of the ski through geometric design, as opposed to altering the core material or density of the ski. Also, for kids it looks cool and feels different than a standard flat ski.

**LYT Tech Construction:** By developing a ski line with lightweight Karuba wood and Graphene fully embedded we were able to increase performance while making it lighter. A unique weight distribution makes tip and tail thicker and the middle section thinner. The V-shape gives you effortless control for better steering, more stability and control.

**PET-Wood Core Carbon Sandwich Cap Construction:** an eco-driven build which is mindful of sustainability while still delivering superb skiing. Utilizing poplar wood, recycled PET plastics and carbon provides optimal performance which is both weight and environmentally conscious.

**PNP Rocker:** Very subtle tip and tail rise with regular camber construction underfoot. PNP Rocker provides a rider a smother turn initiation as well as reduced edge contact to seamlessly butter into tricks and initiate spins. 30% rocker and 70% camber.

**Power Sidewall Jacket:** An innovation in ski construction that combines the well known fiber jacket construction with ABS sidewalls. A lightweight ski with easy skiing performance including sidewalls for better dampening, shock absorption and edge grip. Performance at its best for its great target group.

**Race structured UHM C base:** The highest quality, fastest base and finish known to man. The technicians who build the skis for our Worldcup Rebels use the same material and machines to put this scary fast base and structure into your skis.

**RD Racing Top Sheet:** A thinner topsheet material designed to maximize responsiveness. Exclusive to our RD skis.

**Rebel Camber:** Some years ago, it was rebellious to have rocker. Now, it’s rebellious to have camber. With Rebel Camber, we feature explosive acceleration and excellent edge grip for the Worldcup Rebel inside you.

**Sandwich Cap Construction:** We take the basic framework from the Worldcup sandwich and place a cap that just wraps over the top edge of the sidewall to make the ski more suitable for all mountain skiing. Bomber construction with a rounded top edge makes for one incredible allcountry ski.

**Sandwich Twintip Construction:** We blend a full vertical laminate wood core for durability and add our bomber Independent Suspension System for killing chatter. Pipe, park, big mountains, whatever, bring ’em on and let this construction rip.

**SFC-Snow Free Coating:** The applied coating prevents snow and ice from sticking to the top of the ski. Especially on ski tours, this is an effective remedy against annoying icing and exhausting ascents with skis weighed down by snow loads. But the coating also helps to optimize ski performance on the descent.

**Speed Rocker:** For perfect handling on hardpack – a slight tip rise on a ski with standard camber, which means great performance, easy turn initiation, and high versatility on soft snow. 10% rocker and 90% camber is just enough to take the sting out of the edges, while keeping the bite you need to turn. Speed Rocker turns HEAD performance skis into a weapon of speed with power steering. It’s fast. Are you?

**Structured Surface:** An extra-durable topsheet with a structured exterior. Designed to hold up against the most extreme abuse.

**Structured UHM C Base:** The same high quality material used in HEAD’s world-leading race skis is used here. Different structured running base for all conditions.

**TNT Rocker:** Tip and tail rocker combined with regular camber underfoot. This combination creates a surfy feel in powder while maintaining hard snow versatilty. 40% rocker – 60% camber.

**Tuff-Wall/Base/Edge:** Impact resistant ABS sidewalls. While maintaining responsiveness, Tuffwalls are designed to take a beating. The additional use of thicker edges and running bases ensure that these models can truly be described as bullet proof.

**Twintip Construction:** A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving twintip construction is slightly softer than our sandwich twintip layup, making it better for learning pipe and park tricks.

**UHM C Base:** Our highly durable base material for getting the job done well. Not flashy, but steady and stable. The kind of base that will last for years.

**Wood Core Cap Construction:** A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving construction is slightly softer than our sandwich cap making it ideal for ramping up the learning curve.

**Worldcup Sandwich Construction:** The basic construction invented by Howard Head in the 1940’s, perfected and hand built by the finest ski technicians in the modern world. The vertical laminate wood core is embraced by speedfreak phenolic sidewalls and the finest Titanal®. This is the fastest construction on the planet.

# TECHNOLOGY FEATURES BINDINGS

**ABS - Anti Blocking System:** The exclusive TYROLIA technology of the ABS continuous band allows the boot to move out of the binding almost without any friction, hence delivering maximum safety in case of icing up, dirt and boot wear.

**AFS - Anti Friction Sllder:** New weight optimized adapter for gliding insert at Power Bindings for reduced friction, constant release values and maximum safety.

**AFS Junior:** The innovative mechanical Anti Friction Slider (AFS) automatically adjusts to the boot sole height, compensating A/C standards as well as height differences due to icing up, dirt or boot wear.

**AFS Metal:** The 68 mm wide slider plus a stainless steel gliding element provides constant release values and results in a broader contact area to the ski boot sole.

**Better Balance PR Base:** Inclined Better Balance PR Base providing a ramp angle of 0,75° for all boot sole sizes. Thus, all skiers benefit from easy turn initiation and high speed stability.

**Brakes:** HEAD offers brakes with different width for optimal fit on wider skis and flat skis up to 150 mm ski width in the brake area. Some binding models are delivered without brake - “w/o brake”- to avoid brake exchange later on.

**Climbing Aid:** The climbing aid with its different climbing positions, which can be operated without stepping out of the binding, provides excellent balance and effortless climbing.

**FHR:** The innovative Full Heel Release Technology (FHR) delivers intelligent 180° release both horizontally and vertically ensuring maximum safety in forward and backward twisting fall situations. The FHR function can reduce ACL strain by more than 50 %\*.

**Freeflex Demo:** These racing bindings are for rental purpose. They combine the look and performance of a racing retail binding with the functionality and durability of the rental binding.

**Freeflex Pro:** Best performance enabled by the innovative Freeflex Pro System. The free-gliding heel allows the ski to bend through unimpeded and to retain its natural dynamics. Due to the reduced stand height, the Freeflex band is now much closer to the ski boot. Constant release values reduce the risk of injury and ensure safe ski steering.

**FR LYT Toe:** 15% lighter toe compared to the FR Pro3 Toe, with automatic toe height adjustment for Alpine & GripWalk boots.

**FR Pro Toe:** The Freeride (FR) Pro Toe can be easily adjusted to different boot sole heights. Its horizontal spring reflects the modern architecture of the AAA-Series.

**FR PRO<sup>3</sup> Toe:** The FR PRO<sup>3</sup> Toe offers improved release kinematic to reduce friction and guarantees constant release values. Thanks to the improved AFD it easily adjusts to different boot sole heights. The optimal height adjustment needs to be tested with a testing device for exact adaptation of the boot-binding system and better performance on skis.

**Full Diagonal:** Intelligent 180° release both horizontally and vertically of the Diagonal Toe.

**GripWalk Compatibility:** Ski Bindings with GW in the product’s name are GripWalk compatible and can be adjusted to Adult Alpine (ISO 5355) and GripWalk ski boots (within ISO 9523). Ski bindings with “GW CA” in the product’s name can be used with Adult Alpine (TYPE A), Children Alpine (TYPE C), GripWalk ski boots (TYPE A & C).

**GW:** Bindings marked with GW will fit adult Alpine ski boots (ISO 5355 TYPE A) and adult Walk ski boots (ISO 23223 TYPE A). No further adjustment to boot sole height necessary, except ATTACK models. Optimal height shall be tested with the boot height adjustment tester.

**GW CA:** Bindings marked with GW CA will fit Alpine ski boots (both ISO 5355 TYPE A & TYPE C) plus all Walk ski boots (ISO 23223, TYPE A & TYPE C). No further adjustment to boot sole height necessary.

**HR Heel:** The HR Heel offers the innovative Full Heel Release Technology (FHR), a combination of horizontal and vertical release to ensure maximum safety.

**HR Lite Heel:** The HR Lite Heel offers the innovative Full Heel Release Technology (FHR), a combination of horizontal and vertical release to ensure maximum safety. Compared to the HR Heel it is lighter and has a lower stand height.

**JOY “BB” SLR Pro Base:** Inclined Base providing optimal forward lean. Test sessions with our female test team, have shown that the ideal value is 0.55°, ensuring easy turn initiation and high speed stability.

**MN:** Bindings marked MN will fit adult Alpine ski boots (ISO 5355 TYPE A), adult Walk ski boots (ISO 23223 TYPE A) and all Touring ski boots (ISO 9523). The height of the AFD needs to be adjusted to the ski boot sole height. Optimal height shall be tested with the boot height adjustment tester.

**NX Heel:** 3-piece heel for easy step in and step out. Better stability and power transmission.

**RX-Diagonal Heel:** The RX-Diagonal Heel provides a 150° release. Thus, pressure on the knee and ligaments upon twisting forward falls are reduced.

**SuperLiteRail System:** In combination with the integrated Freeflex-Function the SLR Base provides better energy transmission without affecting the natural ski flex. During the turn, this SuperLiteRail Base guarantees constant force distribution which leads to flawless control, thus enhancing the on hill experience. The remarkable benefits include highly efficient and agile ski performance.

**RX Toe:** The performance oriented RX toe defines stability and power, much as a strong and tough bull extremely durable and absolutely reliable.

**PowerRail:** The unrivalled technology for retail, demo & rental by the well-received rail system on a modular basis provides easiest handling, maximum flexibility, optimized performance, perfect match, more stability and durability.

**Race Diagonal:** Diagonal Toe tuned for racing purposes. Due to its higher release force vertically than horizontally, it holds up to the high backward lean forces in racing.

**Race Pro Heel:** The stand height was reduced according to the actual FIS rules. An increased contact area reduces friction and provides constant forward pressure in all skiing situations.

**SLR Pro Base:** The 2-piece base provides an optimized drill pattern and an enlarged adjustment range of 120 mm. It comes in 3 different mounting positions to cover boot sole lengths between 183 mm and 363 mm.

**STREAM toe:** The racing toe features independent spring-loaded pincers for more precise control, two mounting positions of the gliding element for an adjustable pressure point and a steel base plate between the binding and the plate for a better power transmission. Thanks to the aerodynamic design, even faster runs are possible.

**SX Heel:** Based on improved kinematics the ski boot is precisely secure in the binding. This ensures exact and more direct power transmission from boot to edge.

**SX Junior Toe:** The innovative kinematics of HEAD’s SX adult line provide advantages in performance and stability for the SX Junior line for young speedsters as well.

**SX Kid Toe:** With the SX kid toe for up-and-comers and integrated innovative SX kinematics ski steering now requires even less effort.

**SX Lite Heel:** Weight optimized heel for junior and light-weight skiers with proven safety features of the HEAD/TYROLIA binding technology.

**SX Toe:** The kinematic improvements are reflected in the product design of the SX toe as well. With its high cheek bones it reminds of a fox – smart, spry, agile and very clever.

**SX Youth Heel:** The SX Youth Heel guarantees an easier step-in and out. Due to the new shape of the sole lug and softer brakes the entry force is reduced by 15%.

**Sympro:** With the Rental Sympro bindings, the length of the toe and heel can be adjusted with only a few easy steps. For fast on-hill adjustment.

**Symrent:** With a mobile heel the Symrent bindings can be simply and very quickly adjusted to almost any size of boot.

**Telescopic Tube:** With only one binding model it is possible to cover the entire range of different sole lengths (from 260 mm up to 350 mm).

**TOUR Toe:** Touring toe with Pin technology and an optimized step-in for an easy and fast entry. The ergonomic toe lever can be operated by hand and pole.

**TOUR Heel:** Touring heel with Pin technology, active heel adaptation (6 mm elastic travel) and 25 mm heel adjustment range. The heel piece provides an intuitive handling of hike & ski mode with an automatic brake lock and an isolated mechanism to prevent icing.

**TRP - TYROLIA Roller Pincer System:** The TYROLIA Roller Pincer Toe System (TRP System) of the HEAD bindings with its four rollers and gliding inserts ensure a 180° release and exact centering of the ski boot. The TRP system reduces the load on knees and ligaments and improves performance considerably.

<sup>[1]</sup> finite element model simulations by University of Innsbruck: “Lateral Heel Release Reduces ACL strain in Simulated Backward Twisting Falls”

# TECHNOLOGY FEATURES BOOTS

## LINERS

**Auto Adapt Tech / Women Auto Adapt Tech:** Allows the calf of the liner to widen freely. The cuff can move into the space created by the adjustable profile, to comfortably accommodate all calf sizes.

**Double Power Booster Velcro:** The strap of the Double Power Booster Velcro works as a double pulley for better closure and a tighter wrapping on the cuff. The elastic Booster strap allows more dynamic response on the boot. The result is more precise transmission and faster ski reaction.

**HeatFit (HF) Liners:** Multi-component liners with moldable inserts in liner and tongue. 5 minutes of heating, is all that is required, to make the lining adapting and get the perfect precision and comfort.

**Perfect Fit 3D:** Perfect fit is the revolutionary customization system that ensures comfortable, performances-oriented customization in HEAD's superb skiboosts. The 3D pre-shaped construction have been developed to provide the maximum comfort and optimal adaptation to the foot shape.

**Perfect Fit (PF):** Perfect Fit is the revolutionary customization system that provides the best level of precision, comfort and durability. The Perfect Fit material allows the liner to adapt to your feet, ensuring maximum power transmission. 5 minutes of heating at 80 degrees, is all that is required, to make the lining adapting and get the perfect precision and comfort.

**Pro Liners:** Pro Series are thin and very supportive liners developed to assure maximum wrapping and extreme high performance. They come with a stretchy upper material, thermo-moldable ankle inserts and a rear sliding insert.

**Quick Entry Liners:** These liners come with a unique easy entry construction in the forefoot. Developed both for skiing and walking, Quick Entry liners always feel extremely comfortable.

**Ratchet Velcro:** The new light velcro, offers high performance, quick and efficient closure.

**CRUX Pro HP:** The customizable liner has been designed to best skiing and hiking performance. ATTENTION: The liner should be customized before skiing.

## BUCKLES

**Buckle Lock:** Lock the buckle in a open position for an easy hike.

**Double Power Lever:** The Double Power lever reduces the effort needed to close the buckle by 50%. Developed and patented by HEAD.

**Ratchet Lock:** Lock the buckle's bail in place for a secure fit while ascending.

**Spineflex Buckle:** A revolutionary buckle concept with a flexible element and a constant closure point. The flexible element allows the buckle to adapt to the shell profile. The constant closure point increases the overlap between the shell flaps and reduces pressure points. The increased comfort and precision results in better performance.

**Superleggera Buckle:** The new light buckles: 90% aluminum, simple, effective and reliable.

**Supermacro Ratchet:** An adjustable, ratcheted toothplate that provides 28mm of calf-adjustment.

**Wide-Body Buckle:** Oversized buckle designed for an extreme ease of use. The fastest way to close the boot cuff.

## CRUX – A NEW BENCHMARK POWER LYT DESIGN

### COMFORT SKIN SHELL

Designed to wrap the foot with a balanced and comfortable 99 mm touring last. The reactive material provides lightweight and precise adaptation to the foot.

### CONTROL CUFF

Featuring 2 buckles and a high profile for superior ski control even in the most demanding conditions and speeds.

### LYT DYNAMIC FRAME

Connects the shell, cuff and ski-hike device, providing the direct and powerful energy transmission.

## FEATURES

**Adjustable Rear Spoiler:** Height adjustable spoiler increases rearward support as it's raised.

**Bi-Inj. Frame:** A high performance, multi-density shell that optimizes easy entry, foot wrapping, comfort and energy transmission.

**Double Adjustable Profile:** A double mechanism in the upper rear part of the boot which adapts the circumference of the cuff up to 1cm to fit individual anatomical needs. Located on the either side of the cuff's spine, this mechanism allows the cuff to adjust up to 1cm to better fit the anatomical needs of skier.

**Duo Flex:** Enables a progressive and reactive flex with precise ski control through all phases of the turn.

**Easy Entry Shell Design:** Located in the throat of the boot, 4 channels are cut into the plastic to reduce the thickness of the material and thus provide smoother entry and better wrapping to the foot.

**Extended Toe Box:** The longer toe box has been designed to reduce torsion and increase power transmission.

**EZ Tech Shell:** With Head's EZ-Tech shell design, every skier can enjoy its benefits: EZ-On, EZ-Walk, and EZ-Ski. These new boots are YOUR EDGE TO BETTER SKIING.

**Flex Stance Tuning:** Screw mechanism with a plate support on the spine of the cuff. By adding the screw(s) the link between shell and cuff becomes stronger and the flex of the boot stiffer. It also works as a forward lean adjuster.

**Flex Tuning:** A screw mechanism on the spine of the cuff that links shell and cuff. To get a softer flex, the screw(s) can be replaced by the plastic caps included in the box.

**Form Fit:** 100% customizable shell fit system. New Form Fit plastic holds modifications better than ever.

**Graphene:** The Graphene infused plastic combined with the new Smart Frame shell delivers the perfect balance of performance, comfort and lightweight design.

**Hi-Top Tech:** Direct contact between the boot tongue and shell delivers supreme support for more confident skiing.

**Integrated AutoSkiWalk (ASW):** HEAD patented integrated device which automatically switches between skiing and walking position when stepping in or out of the bindings.

**Liquid Fit:** Material provides the most precise and the quickest customization. The material's density ensures the perfect mold in the most critical area of the boot, the ankle and heel pocket. The performance and precision of a foam liner in 10 easy, comfortable minutes.

**Power Control Frame:** Designed to reinforce the Cube 3 line shell structure in order to give more stability and performance to the boot.

**Power Plate:** HEAD has designed a Velcro spoiler to increase support through the upper cuff, adding a higher level of performance.

**Power Flex:** enables a progressive and reactive flex with precise ski control through all phases of the turn.

**Rubber Insert:** Designed for enhanced grip when hiking.

**Ski-Hike Mechanism:** provides strong, precise connection between upper and lower boot.

**Smart Frame:** The new lightweight shell construction is specifically designed for a more dynamic rebound that greatly improves performance for the all mountain skiers.

**Stiffer/Softer Flex Adjustment:** It's an adjustment placed on the spine of the cuff to select between a stiffer or softer flex depending on snow condition and level of skiing.

**Vibram Durastep Outsole:** The rubber sole designed for reliability, durability and grip.

**Traction Lug:** Designed micro elements developed for a better grip.
