

Just
Boots

LANGE

BRAND MANIFESTO

**Just Boots.
That's all we make.
All we think about.
Every day.
Performance. Power. Precision.
Fit. Flex. Fun.
These aren't just
buzzwords in catalogues.
They're what keeps
us up at night.
Because nobody
"just" wins hundreds
of gold medals.
And nobody "just"
invents the modern
ski boot.**

**Great things need
a little obsession.
So after 60 years
of making just boots,
you know they'll never
be just boots.
Lange. Just Boots.**

PERFORMANCE IS OUR MISSION

DUAL CORE

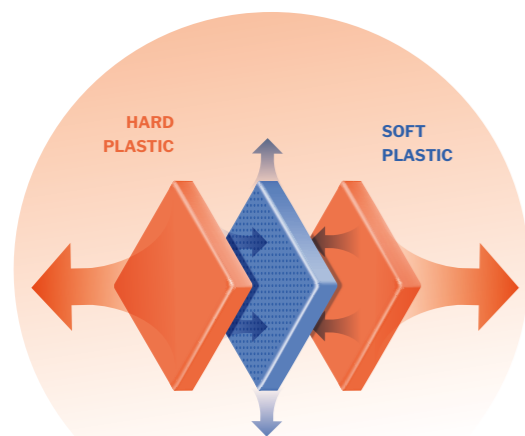

How it works?

By sandwiching a softer plastic core within more rigid plastic we are able to drastically enhance elastic tension. As you drive and flex into your boots, Dual Core actively compresses and expands – harnessing potential energy to deliver explosive power, snap and rebound.

Skier benefits:

- MORE POWER & RESPONSIVENESS**
- PROGRESSIVE & CONSISTENT FLEX**

- 1 By sandwiching a softer plastic core within more rigid plastic produce energy.
- 2 It actively compresses and expands harnessing potential energy to deliver explosive power snap and rebound.

Dualcore (LANGE)

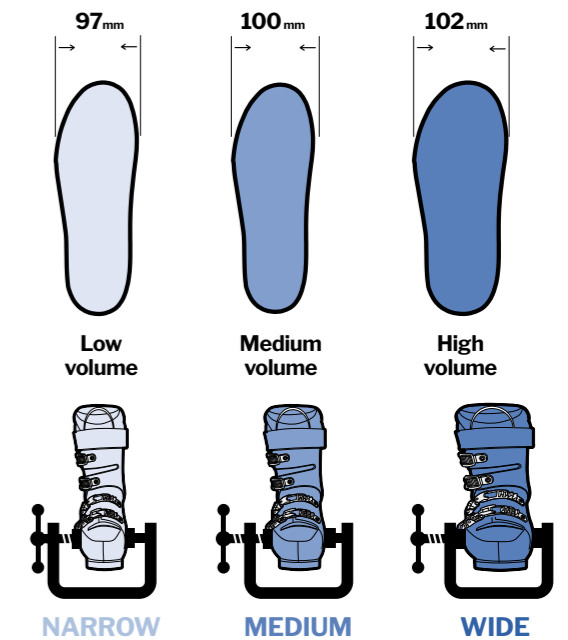

- 1. COMPRESSION**
The softer core of the boot absorbs energy.
- 2. TENSION**
Hard outer layers create tension.
- 3. EXTENSION**
The constant interaction of the 2 layers transfers the energy to and from the ski.

FIT IS OUR OBSESSION

Liners adapted to your morphology and ski practice.

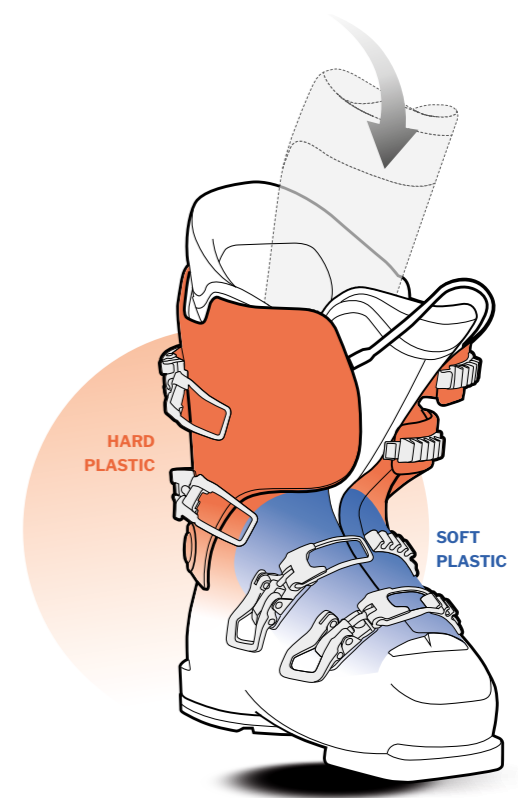

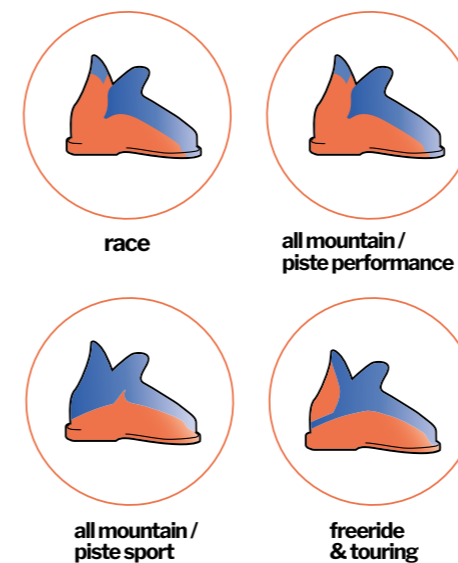

At Lange, performance and comfort go hand in hand. Performance is nothing without comfort, and comfort is nothing without performance. Offering a boot that both respects the morphology of your foot and adapts perfectly to your discipline is our obsession. This is why, thanks to the unique know-how of our engineers and our 60 years of expertise in the world of ski boots, Lange is the only brand able to offer more than 50 different liners, all of which adapt to different morphologies and disciplines. Our boots are both rigid and high-performance, while remaining comfortable and adapted to your body shape.

Choose the volume adapted to your morphology and practice:

Easy Entry and Exit

A softer plastic insert molded over the instep area allows easier opening of the boot overlap for more comfortable entry and exit.

NEW RS

New blue New blood

Since 1948, Lange has been making history in the world of alpine skiing. Its very first boots, designed for speed, embody the “racing” DNA of this now iconic brand.

Blue for victory

The distinctive Lange blue unites those who perpetuate the brand’s original passion for downhill racing. Now legendary, this iconic colour is a symbol for the athletes and teams who, every day, endeavour to create the most advanced models.

In 2022, the brand will be injecting new blood into its racing collection. Increasingly driven by bold innovation, it is reworking its colour range. Enhancing its flagship colour, Lange has created a deeper, midnight blue. This latest generation of blue emanates from the colour of the boots worn by Alberto Tomba during his last victory. It expresses the concentrated technology encapsulated in the heart of the new RS range.

TRUE BLUE TEAM

Manifesto

Blue racing team: racing in the blood

Downhill racing is like Formula 1. The results of these skiers, extreme riders par excellence, depend in part on the quality of their equipment. This is where the blue racing team comes in. In the workshops of Montebelluna, the leading district for sports shoe manufacturing, no fewer than 20 expert bootfitters hone every detail of every model for every racer.

Engineers, operators, technicians, bootfitters and the race team in the field all work together to create a boot that conforms perfectly to the foot of each athlete, thus enhancing their performance.

“The foot is the only link between the boot and the ski.”

“Bootfitting is about accurately fitting the shell of the boot to each athlete. It has to be perfect so the athlete has the control of a precise, high-performance racing model.”, explains Gabriele Frare, Lange bootfitter since 26 years.

*New blue,
new blood.*

RX

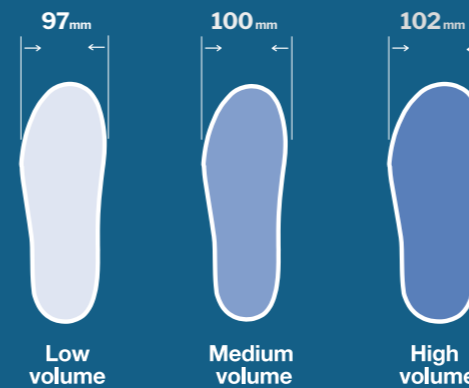

Developed to provide power and precision to skiers, the RX Men's and Women's ranges offer the performance of a racing boot combined with optimum comfort. It's the ideal balance for perfecting your turns on the slopes all day long.

FIT TECHNOLOGY

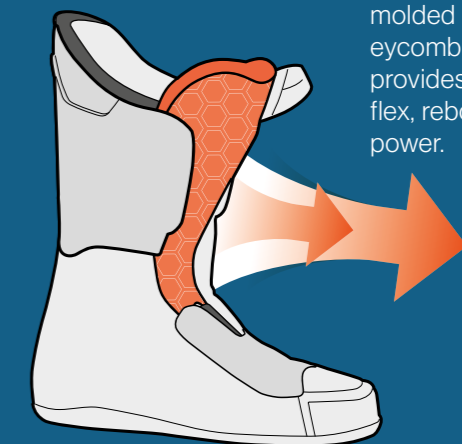

At Lange, fit and comfort are our obsession. Performance is nothing without comfort, and comfort is nothing without performance.

That's why we've developed different shell and liner shapes for every flex and size, to provide you with the boot that best fits your foot shape, no matter what your performance level.

REACTIVE BOOST TONGUE

Made with high energy polyurethane material and molded in a reactive honeycomb structure, the R.B.T. provides more dynamic flex, rebound and energetic power.

LX

The LX boot is the most flexible and comfortable model in our piste and all-mountain range. With a 102 mm last and more accessible materials, it is perfect for skiers looking for versatility on the slopes while maintaining foot support.

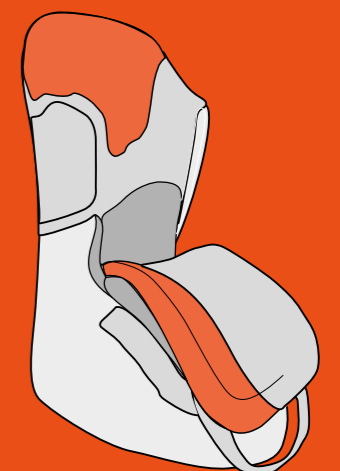

Just Boots

WOMEN TECHNOLOGY

Lange boots are adapted to the specific morphology and needs of women. The shape of the liners is adapted, the materials are chosen to provide more warmth and comfort, the shell is shorter and the cuff is more open at the calf.

SHIN CONTROL

Our unique women-specific Shin Control liner offers maximum comfort while maintaining the required precision and responsiveness for optimum ski control. The anatomical asymmetric tongue distributes shin pressure as for enhanced comfort and more control.

XT3 TOUR

GET UP TO GET AWAY

That's what the new XT3 TOUR ski boot is all about: getting you to that little piece of heaven, hidden from view because it's tucked away just a little bit higher up beyond that ledge. Put on your XT3 Tour boots and climb up to this El Dorado covered in fresh snow, which is anything but easy and only available to the most deserving! Reconnect with nature by reaching this restricted face, this pristine slope, this fresh snow, where calm reigns due to its inaccessible nature. Except for the most determined. Except for the best equipped. Then tear down this mountain side. Leave the first tracks. Feel privileged, and more alive than ever!

EXCELLENT DESCENT, FROM EVEN HIGHER

This is how the XT3 Tour was born. This rigid boot retains the aggressive behaviour and unique snow feel on descents that form the heart of Lange's DNA. With incomparable performance made possible by the Dual Core technology, the patented sandwich construction has revolutionised the market. But the XT3 Tour also brilliantly responds to the codes of touring with its competitive weight/power ratio

thanks to the use of Grilamide® plastic, its grip offered by the Vibram sole, and a thermoformed liner whose ergonomics allow a natural foot roll when walking. This is how the brand responded to the challenge it had set itself: to provide a boot that offers the same excellent skiability on the downhill, especially when you take it higher and further!

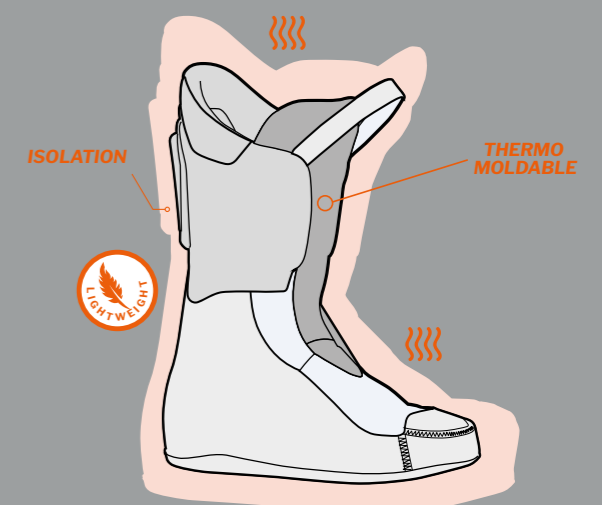

VIBRAM

Vibram® ISO 9523 fully rocker touring sole provides the ultimate grip in rocky approaches.

LINER TOURING

XT3 TOUR WOMEN

Discover the brand-new Lange free-touring boot especially for women.

The XT3 Tour for Women is dedicated to women skiers looking for power and rigidity on the downhill while easily accessing that pristine, untouched slope that is inaccessible to most. Take advantage of Lange's DNA: precision, rebound, and power in a comfortable boot, adapted to the movement of the foot when walking and to the morphology of women. Reconnect with nature, to the origins of skiing and its values of limitless freedom.

WOMEN TECHNOLOGY

Lange boots are adapted to the specific morphology and needs of women. The shape of the liners is adapted, the materials are chosen to provide more warmth and comfort, the shell is shorter and the cuff is more open at the calf.

XT3 FREE

Skiing, by nature, is a story of descent. At Lange, this is how we have always conceived freeriding. Pure and authentic freeriding. An invitation to defy the laws of nature. Freeriding that leaves an indelible mark on every skier's memory. The memory of an unforgettable day of 'gliding'. A day that can be summed up in just three words: adventure, powder and adrenaline.

ACTIVE POWER V-LOCK

The heart of Lange's all-new XT3, Active Power V-Lock is our patented new multi-performance freetouring technology. Designed to get you up with ease, but powered for the down, Active Power V-Lock delivers an 11° increase in forward ROM in HIKE mode, making long skin strides and hikes more efficient and less fatiguing. But lock it down for the descent with a SKI mode that offers the rock-solid connection of a traditional ski boot and you'll instantly feel the power, precision, and control you've been looking for when it's all about the down.
